In The Company Of Educated Men:

In The Company of Educated Men Leonace Gaiter, 2014-12-07 Lennie's father's death shatters his dream life of entitlement and privilege. Aimless, he buys a beat-up car and sets out to discover America. At a gas station, a carjacker and runaway girl derail the grand plan, and now with the Feds, local police, and thugs in hot pursuit, he meets the blunt edge of a racial underclass in a way never imagined. *An Educated Man* David Rosenberg, 2011-05-10 A magisterial project, a dual biography of the preeminent figures of Judeo-Christian civilization overturning conventional views of Moses and Jesus as humble men of faith. By reanimating the biographies of Moses and Jesus in their historical context, Rosenberg reads their narrative as a cultural rather than religious endeavor. He charges that Moses and Jesus were educated men steeped in the literature and scholarship of their day. There were no old or new testaments for them; only a long history of writing and writers. When scholars and clergy quote Moses and Jesus, they routinely neglect to inform us that Jesus is quoting the Hebrew Bible, often in the manner that Moses quoted Egyptian medical texts. The remarkable ability of both men to recall and transform a wide range of sources is overlooked. Where did they get these profound educations? Part biography, part critical analysis, *An Educated Man* challenges us to envision what defines an educated man or woman today and how understanding religious history is crucial to it. Rosenberg offers a sympathetic approach to why we need Judeo-Christianity and ultimately convinces us that the life of Jesus is unthinkable without the model of Moses before him. **Proceedings of the Stanford Conference on Business Education** Stanford University. Graduate School of Business, 1926. *University Education & Business* University of Cambridge. Committee on Special Enquiry into University Education as a Preparation for Business, 1945. **Hearings, Reports and Prints of the Senate Committee on Labor and Human Resources** United States. Congress. Senate. Committee on Labor and Human Resources, 1979. Rethinking Undergraduate Business Education Anne Colby, Thomas Ehrlich, William M. Sullivan, Jonathan R. Dolle, 2011-04-20 Business is the largest undergraduate major in the United States and still growing. This reality, along with the immense power of the business sector and its significance for national and global well-being, makes quality education critical, not only for the students themselves but also for the public good. The Carnegie Foundation for the Advancement of Teaching's national study of undergraduate business education found that most undergraduate programs are too narrow, failing to challenge students to question assumptions, think creatively, or understand the place of business in larger institutional contexts. *Rethinking Undergraduate Business Education* examines these limitations and describes the efforts of a diverse set of institutions to address them by integrating the best elements of liberal arts learning with business curriculum to help students develop wise, ethically grounded professional judgment. *Congressional Record* United States. Congress, 1995. **Creating the College Man** Daniel A. Clark, 2010-05-25 How did a college education become so vital to American notions of professional and personal advancement? Reared on the ideal of the self-made man, American men had long rejected the need for college. But in the early

twentieth century this ideal began to change as white men born in the U S faced a barrage of new challenges among them a stultifying bureaucracy and growing competition in the workplace from an influx of immigrants and women At this point a college education appealed to young men as an attractive avenue to success in a dawning corporate age Accessible at first almost exclusively to middle class white males college funneled these aspiring elites toward a more comfortable and certain future in a revamped construction of the American dream In *Creating the College Man* Daniel A Clark argues that the dominant mass media of the era popular magazines such as *Cosmopolitan* and the *Saturday Evening Post* played an integral role in shaping the immediate and long term goals of this select group of men In editorials articles fiction and advertising magazines depicted the college man as simultaneously cultured and scientific genteel and athletic polished and tough Such depictions underscored the college experience in powerful and attractive ways that neatly united the incongruous strains of American manhood and linked a college education to corporate success
