Kenya National Bibliography Kenya National Library Service. National Reference & Bibliographic Department, 2012

*The Kenya Education Directory*, 2003      **Report of the Proceedings of the Third Teacher Education Conference**

, 1995      Peak Revision K.C.P.E. Science ,      *The Right to Research* Kate Reed, Marcia C. Schenck, 2023-01-15 Refugees and displaced people rarely figure as historical actors and almost never as historical narrators We often assume a person residing in a refugee camp lacking funding training social networks and other material resources that enable the research and writing of academic history cannot be a historian because a historian cannot be a person residing in a refugee camp The Right to Research disrupts this tautology by featuring nine works by refugee and host community researchers from across Africa Europe and the Middle East Identifying the intrinsic challenges of making space for diverse voices within a research framework and infrastructure that is inherently unequal this edited volume offers a critical reflection on what history means who narrates it and what happens when those long excluded from authorship bring their knowledge and perspectives to bear Chapters address topics such as education in Kakuma Refugee Camp the political power of hip hop in Rwanda women migrants to Yemen and the development of photojournalism in Kurdistan Exploring what it means to become a researcher The Right to Research understands historical scholarship as an ongoing conversation one in which we all have a right to participate      *Peak Revision K.C.P.E. English* ,      *Public Examinations Examined* Thomas Kellaghan, Vincent Greaney, 2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book's primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease

takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog Angela W Little Professor Emerita Institute of Education University College London This book is very well structured and written and draws on the authors remarkable global knowledge across countries and histories It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings Mark Bray UNESCO Chair Professor of Comparative Education University of Hong Kong and former Director UNESCO International Institute for Educational Planning I am sure that Public Examinations Examined which thoroughly analyzes the practice of public examinations in different countries and makes profound and well grounded conclusions will arouse very great interest and will serve to further improve public examinations Victor Bolotov Distinguished Professor Higher School of Economics National Research University Moscow member Russian Academy of Education and former Deputy Minister of Education Russian Federation

The Education Alibi Elizabeth Cooper, Erdmute Alber, Wandia Njoya, 2025-10-22 Education is generally promoted as the key to the future of Africa in global development discourses about the continent Education s official story in Africa continues to be one of innocence and public good yet since colonial times education has constituted an area of intense contestation The Education Alibi asks if it is possible that while claiming to be doing one thing education has also been doing another in African communities The concept of the alibi shines an interrogative light on institutions and actors use of education to divert scrutiny from other effects Through ethnographic research and critical analysis across the continent this volume focuses on people s lived experiences to demonstrate how contemporary education systems in fact deepen economic racialized gendered urban rural linguistic religious and other intranational and international inequalities

Natural Science Education, Indigenous Knowledge, and Sustainable Development in Rural and Urban Schools in Kenya Darren M.

O'Hern, Yoshiko Nozaki, 2014-05-05 Through a multi sited qualitative study of three Kenyan secondary schools in rural Taita Hills and urban Nairobi the volume explores the ways the dichotomy between Western and indigenous knowledge operates in Kenyan education In particular it examines views on natural sciences expressed by the students teachers the state s curricula documents and schools exam oriented pedagogical approaches O'Hern and Nozaki question state and local education policies and practices as they relate to natural science subjects such as agriculture biology and geography and their dismissal of indigenous knowledge about environment nature and sustainable development They suggest the need to develop critical postcolonial curriculum policies and practices of science education to overcome knowledge oriented binaries emphasize sustainable development and address the problems of inequality the center and periphery divide and social cultural and environmental injustices in Kenya and by implication elsewhere In an era of environmental crisis and devastation education that supports sustainability and survival of our planet is needed Within a broader sociopolitical context of post colonialism and globalization this volume points out possibilities and challenges to achieve such an education The authors propose a critical postcolonial approach that acknowledges the contextual and situational production of all knowledge and that de dichotomizes indigenous from Western scientific knowledge Eric Rico Gutstein Professor Curriculum and Instruction University of Illinois at Chicago USA      Kenya National Assembly Official Record (Hansard) ,1988-07-12 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya      **Kenya National Assembly Official Record (Hansard)** ,1988-07-12 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya

*Ethnographic Contributions to the Study of Endangered Languages* Tania Granadillo, Heidi A. Orcutt-Gachiri, 2022-08-23 It is a feature of the twenty first century that world languages are displacing local languages at an alarming rate transforming social relations and complicating cultural transmission in the process This language shift the gradual abandonment of minority languages in favor of national or international languages is often in response to inequalities in power signaling a pressure to conform to the political and economic structures represented by the newly dominant languages In its most extreme form language shift can result in language death and thus the permanent loss of traditional knowledge and lifeways To combat this indigenous and scholarly communities around the world have undertaken various efforts from archiving and lexicography to the creation of educational and cultural programs What works in one community however may not work in another Indeed while the causes of language endangerment may be familiar the responses to it depend on highly specific local conditions and opportunities In keeping with this premise the editors of this volume insist that to understand language endangerment researchers and communities must come to understand what is happening to the speakers not just what is happening to the language The eleven case studies assembled here strive to fill a gap in the study of endangered

languages by providing much needed sociohistorical and ethnographic context and thus connecting specific language phenomena to larger national and international issues The goal is to provide theoretical and methodological tools for researchers and organizers to best address the specific needs of communities facing language endangerment The case studies here span regions as diverse as Kenya Siberia Papua New Guinea Mexico Venezuela the United States and Germany The volume includes a foreword by linguistic anthropologist Jane Hill and an afterword by poet and linguist Ofelia Zepeda

African Journal of Education Studies ,2006     *Parents* ,2005     Burning Ambition Elizabeth Cooper,2022-07-19 Burning Ambition explores how young people learn to understand and influence the workings of power and justice in their society Since 2008 hundreds of secondary schools across Kenya have been targeted with fire by their students Through an in depth study of Kenyan secondary students use of arson Elizabeth Cooper asks why With insightful ethnographic analysis she shows that these young students deploy arson as moral punishment for perceived injustices and arson proves an effective tactic in their politics from below Drawing from years of research and a rich array of sources Cooper accounts for how school fires stoke a national conversation about the limited means for ordinary Kenyans and especially youth to peacefully influence the governance of their own lives Further Cooper argues that Kenyan students actions challenge the existing complacency with the globalized agenda of education for all demonstrating that submissive despondency is not the only possible response to the failed promises of education to transform material and social inequalities
