**Dwell** ,2008-03 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

**Capsules: Typology of Other Architecture** Peter Šenk,2017-10-12 This book investigates the architectural product design and urban typology of the capsule which beginning in the 1960s broadened the concept of the basic building blocks of architecture to include a minimal living unit called the capsule Here it is presented with regard to the continuity of the development of the Modern Movement its revisionist criticism pioneering examples as well as contemporary examples and uses The typology of the capsule allows us to consider this theme in terms of the architecture of resistance with the potential to search for an other architecture that is embedded in our contemporaneity manifested in small dwellings composite structures and container units shelters and mobile homes in nature and the urban environment technology transfer in high tech designs devices additions and extensions etc The concept of the capsule as a building element of architecture as well as a spatial element can therefore be regarded as having a generative potential for an architecture of personal space for the individual forcing us to reflect on our existing living and dwelling conditions

The British National Bibliography Arthur James Wells, 2009 **Wood Houses** Ruth Slavid, 2006-10-01 A superbly illustrated survey profiling noteworthy new homes from around the world all constructed from the architect's latest cutting edge material wood Contemporary architects have long overlooked the great versatility of wood as a building material Now however they have begun to adopt wood as the natural solution to a variety of design problems and as a result this environmentally sustainable material is becoming increasingly significant in today's domestic architecture Wood Houses by noted architecture journalist Ruth Slavid displays the entire breadth of this important architectural movement by covering forty six recently built homes The featured houses range from Fernau and Hartman Architects Mann Residence in Sonoma County a timber frame house with a strikingly decentralized plan to 24H Architecture's Arjang House in Värmland Sweden a reindeer fur lined cedar shingled lakeside retreat Each house's profile is illustrated with not only the architect's own plans and elevations but also numerous full color interior and exterior photographs that highlight the intrinsic beauty of wood Slavid explores the background of the present wood house renaissance in an introduction that covers topics as wide ranging as timber frame construction the use of wood in an urban setting and fire prevention She goes on to illuminate significant trends in the field of wooden home design such as timber's popularity as a construction material for vacation homes and the evolution of deliberately austere aesthetics from wood's innate qualities Other topics include the liberation of wood from its familiar associations to serve as the basis of modern design and the current status of wood houses as part of a larger urban or suburban development A helpful appendix features project credits and a glossary This beautiful volume will serve as both a reference and an inspiration for anyone who designs builds or simply lives in wood houses **New Work, New**

**Workspace** Ruth Slavid, 2020-09-30 Does it matter where and how we work any more Increasingly many of us can work anywhere so what is the meaning of the dedicated workspace With 30 detailed case studies of all kinds of workspaces from traditional workspaces to writer s sheds and studios this book argues that a specific place to work is still needed but that the kind of space is changing fast As social interaction is favoured over places to toil and as millennials and Generation X take a very different attitude to work than their predecessors being more concerned with completing tasks than presenteeism so the needs of design change There are increasing metrics for measuring the effectiveness of workspace and they show that good design design that is focused on the environment and wellbeing that the workforce needs is valued At the same time there are more generic spaces such as co working spaces that have to fit all or at least all of the target community Case studies include 80 Atlantic Avenue Toronto Nick Veasey studio and gallery Kent Kostner House Italy GS1 Lisbon
