 - *how people make decisions*
 - **People face trade-offs**
 - I.e.: choosing btwn going to the cinema or working
 - **Cost of smtn is what you give up to get it**
 - I.e.: during the time you were studying, attending classing you could have earned money working
 - **Rational ppl think at the margin**
 - I.e.: when a firm decides whether to produce an extra unit of some good, it will always look at the cost of producing 1 extra unit vs. the benefit
 - **Ppl respond to incentives**
 - I.e.: gov't imposes a higher tax on cigarettes → ppl would stop smoking
 - *how people interact*
 - **Trade can make everyone better off**
 - people specialize in the things they are good at so that they can trade with one another
 - **absolute advantage**: ability to produce a good using fewer inputs than another producer
 - **comparative advantage**: ability to produce a good at a lower opportunity cost than another producer
 - gains from trade are based on comparative advantage because both parties will benefit when they specialize in smt where both will consume more goods and reach points outside the ppf
 - **graph**: people face trade-offs btwn certain goods b/c their budget is limited so only the points inside and on the production possibility frontier are attainable however with trade, people will specialize and obtain points outside the curve
