Bakich, 2016-06-01 In this book Astronomy Magazine editor Michael Bakich presents all the information you'll need to be ready for the total solar eclipse that will cross the United States on August 21, 2017. In this one resource you'll find out where the eclipse will occur, how to observe it safely, what you'll experience during the eclipse, the best equipment to choose, how to photograph the event, detailed weather forecasts for locations where the Moon's shadow will fall, and much more. Written in easy-to-understand language and with a glossary for those few terms you may not be familiar with, this is the must-have reference for this unique occurrence. It's not a stretch to say that this eclipse will prove to be the most viewed sky event in history. That's why even now, more than a year before the eclipse, astronomy clubs, government agencies, cities, even whole states are preparing for the unprecedented onslaught of visitors whose only desire is to experience darkness at midday. But starting with Nicholas Rowe in 1709 and continuing to the present day, Shakespeare editors have mixed Folio and Quarto texts, gradually corrupting the original Complete Works with errors and conflated textual variations. The second edition of the Complete Works features annotations and commentary from Jonathan Bate and Eric Rasmussen, two of today's preeminent Shakespeare scholars, as well as cutting-edge textual design, on-page glossaries for contemporary readers, stage directions from RSC directors, a sixteen-page insert of photographs from RSC production, shorts, a timeline of the plays and poems, and family trees for the Histories. Combining innovative scholarship with brilliant commentary and textual analysis that emphasizes performance.
