Dean, Suzanne Milton, 1999-06-24 The succulent and Nama karoo form part of the arid south western zone of Africa a vast region of rugged landscapes and low treeless vegetation Studies of this unique biome have yielded fascinating insights into the ecology of its flora and fauna This book originally published in 1999 is the first to synthesise these studies presenting information on biogeographic patterns and life processes form and function of animals and plants foraging ecology landscape level dynamics and anthropogenic influences Detailed analyses of the factors distinguishing the biota of the Karoo from that of other temperate deserts are given and generalisations about semi arid ecosystems challenged The ideas expounded the ecological principles reviewed and the results presented are relevant to all those working in the extensive arid and semi arid regions of the world **Growth and Institutions in African Development** Augustin K. Fosu, 2015-03-24 Recent years have seen a sustained research effort exploring the African development experience The extant literature has offered a large set of explanations as to why the African development record has lagged behind that of other regions of the developing world This new volume brings international contributors together to focus on the role of growth and institutions First it provides brief evidence on the growth and institutional records as well as on development outcomes during the post independence period Second it targets certain growth determinants including industrial embeddedness innovation exchange rate regimes and environmental quality Third it sheds light on the dynamics and distribution of growth and on growth enhancing sectors of the economy Finally it investigates several issues of institutional development as well as institutions generating development outcomes Though focused on these two key areas the coverage strives to achieve a comprehensive analysis of how Africa s development may have been enhanced or undermined and to offer lessons for the future This volume is essential reading for all scholars of development economics and development studies Gender and Identity around the World Chuck Stewart, 2020-11-09 This book provides an indispensable resource for high school and college students interested in the history and current status of gender identity formation and maintenance and how it impacts LGBTQ rights throughout the world Gender and Identity around the World explores a variety of gender and LGBTQ experiences and issues in countries from all the world s regions Guided by more than 50 recognized academic experts readers will examine how gender and LGBTQ identities are developed fought for perceived and policed in countries as diverse as France Brazil Russia Jordan Iraq and China Each chapter opens with a general introduction to a country or group of countries and flows into a discussion of gender and identity in terms of culture education family life health and wellness law work and activism in that region of the world A section on contemporary issues specific to the country or group of countries follows this discussion Breathing Life Into Fossils Travis Rayne Pickering, Kathy Diane Schick, Nicholas Patrick Toth, 2007 Taphonomy the study of the processes leading to the fossilization of organic remains is one of the most important avenues of inquiry in human origins research Breathing Life into Fossils is a

Territorial Governance and Spatial Transformation in Post-apartheid South Africa Daniel du Plessis, 2025-07-05 The book provides a reflective account of the evolution of the territorial governance structures and processes in South Africa over a period of 30 years after the transition to a post apartheid society in 1994 It also considers the role and influence of these changing governance institutions and processes and their associated outputs in the form of policies and plans on several priority dimensions of urban spatial transformation The synthesis of the experiences and lessons learnt provides the bases for contemplating important future focus areas for territorial governance such as spatial transformation towards smart cities an African perspective for future South African cities and transitioning towards a streamlined integrated territorial governance system The lessons and experiences are not only of local significance in South Africa but also globally in countries and regions faced with territorial governance and spatial transformation challenges

Urbanization and Industrialization for Africa's Transformation , 2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization Urbanization is one of Africa mega trends with profound implications for the social economic environmental dimensions of growth and transformation Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa So far current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and in particular the advantages presented by productivity enhancement and agglomeration effects generated by cities Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development Both agendas recognize urbanization as a critical factor for sustainable development It is also important to consider urbanization and industrialization in light of Africa s engagement with the Third United Nations Conference on Housing and Sustainable Urban Development Habitat III to be held in Quito Ecuador in October 2016 In this context African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth
