

Measuring engagement is critical to understanding your workforce and its needs. Trends in employee engagement are insightful since they're linked to many organizational performance outcomes. As you can see in the trend line above, engagement levels have varied slightly over the past five years.

In 2023, we saw engagement levels drop back to pre-pandemic levels with 50% of employees engaged and 48% disengaged or what some may consider "quiet quitting." When compared with 2021 peak engagement levels of 57%, employees are feeling significantly less engaged and less satisfied with their organizations year over year. Actively disengaged employees account for approximately \$3.8 trillion in lost productivity nationally.¹ Since 2020, the percentage of actively disengaged and opportunity group employees have increased by two and three percentage points respectively.
