Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The

securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced. These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone. This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former. Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal, Australia, the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this. Content: INTRODUCTION by Arma an Teke Lloyd. PART A Ideology and Governance of Migration. CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe. Post-Soviet Power Susanne A. Wengle, 2015-02-05 Post Soviet Power tells the story of the Russian electricity system and examines the politics of its transformation from a ministry to a market Susanne A Wengle shifts our focus away from what has been at the center of post Soviet political economy corruption and the lack of structural reforms to draw attention to political struggles to establish a state with the ability to govern the economy She highlights the importance of hands on economic planning by authorities post Soviet developmentalism and details the market mechanisms that have been created This book argues that these observations urge us to think of economies and political authority as mutually constitutive in Russia and beyond Whereas political science often thinks of market arrangements resulting from political institutions Russia s marketization demonstrates that political status is also produced by the market arrangements that actors create Taking this reflexivity seriously suggests a view of economies and markets as constructed and contingent entities
