Christine Tamasy

Geography Paper1 Memo 201:

Resources in Education ,1989 **Globalising Worlds and New Economic Configurations** Christine Tamasy,2017-11-28 Over the last few decades circuits of capital have been stretched through processes of economic globalization leading to complex and hybrid outcomes that result in different modes of production and consumption Understanding these new economic configurations and their geographic patterns requires incorporating new theoretical arguments based on for example chain and network concepts This edited volume brings together theoretically informed analysis from Asia Europe and North America to illustrate the way in which new economic configurations have been developed and to understand individual local and regional responses to a variety of global challenges threats and opportunities The different examples presented illustrate that economic structures and flows have changed dramatically over the past decades with profound impacts for the economic and regional actors involved **Library of Congress Catalogs** Library of Congress,1982 **Protection and Empire** Lauren Benton,Adam Clulow,Bain Attwood,2017-11-02 For five centuries protection has provided a basic currency for organising relations between polities Protection underpinned sprawling tributary systems permeated networks of long distance trade reinforced claims of royal authority in distant colonies and structured treaties Empires made routine use of protection as they extended their influence projecting authority over old and new subjects forcing weaker parties to pay them for safe conduct and sometimes paying for it themselves The result was a fluid politics that absorbed both the powerful and the weak while giving rise to institutions and jurisdictional arrangements with broad geographic scope and influence This volume brings together leading scholars to trace the long history of protection across empires in Asia Africa Australasia Europe and the Americas Employing a global lens it offers an innovative way of understanding the formation and growth of empires and uncovers new dimensions of the relation of empires to regional and global order **Monographic Series** Library of Congress, **School Subjects and Curriculum Change** Ivor F. Goodson,2013-04-03 The process of curriculum development is highly practical as Goodson shows in this enlarged anniversary third edition of his seminal work The position of subjects and their development within the curriculum is illustrated by looking at how school subjects in particular geography and biology gained academic and intellectual respectability within the whole curriculum during the late 1960s and early 1970s He highlights how subjects owe their formation and accreditation to competing status and their power to compete in the provision of worthwhile knowledge and considers subjects as continually changing sub groups of information Such subjects from the framework of the society in which individuals live and over which they have influence This volume questions the basis on which subject disciplines are developed and formulates new possibilities for curriculum development and reform in a post modernist age **Title Announcement Bulletin** ,1957 **Annual Report of the Board of State Auditors for the State of Michigan for the Year ...** Michigan. Board of State Auditors,1894 [Joint Documents of the State of Michigan](#) Michigan,1895 **Land Use**

David Rhind, Ray Hudson, 2023-04-01 Originally published in 1980 this book draws together a wide range of studies dealing with various aspects of land use in a text specifically designed to guide students through the complexities of the subject It examines the history of the subject its techniques applications the models that it applies and the frameworks within which it has been carried out Land use remains a central political and practical issue in contemporary society Economic Aspects of Genocides, Other Mass Atrocities, and Their Prevention Charles H. Anderton, Jurgen Brauer, 2016-05-09 Alongside other types of mass atrocities genocide has received extensive scholarly policy and practitioner attention Missing however is the contribution of economists to better understand and prevent such crimes This edited collection by 41 accomplished scholars examines economic aspects of genocides other mass atrocities and their prevention Chapters include numerous case studies e g California s Yana people Australia s Aborigines peoples Stalin s killing of Ukrainians Belarus the Holocaust Rwanda DR Congo Indonesia Pakistan Colombia Mexico s drug wars and the targeting of suspects during the Vietnam war probing literature reviews and completely novel work based on extraordinary country specific datasets Also included are chapters on the demographic gendered and economic class nature of genocide Replete with research and policy relevant findings new insights are derived from behavioral economics law and economics political economy macroeconomic modeling microeconomics development economics industrial organization identity economics and other fields Analytical approaches include constrained optimization theory game theory and sophisticated statistical work in data mining econometrics and forecasting A foremost finding of the book concerns atrocity architects purposeful strategic use of violence often manipulating nonrational proclivities among ordinary people to sway their participation in mass murder Relatively understudied in the literature the book also analyzes the options of victims before during and after mass violence Further the book shows how well intended prevention efforts can backfire and increase violence how wrong post genocide design can entrench vested interests to reinforce exclusion of vulnerable peoples and how businesses can become complicit in genocide In addition to the necessity of healthy opportunities in employment education and key sectors in prevention work the book shows why new genocide prevention laws and institutions must be based on reformulated incentives that consider insights from law and economics behavioral economics and collective action economics **The Unintended Consequences of Peace** Arie Marcelo Kacowicz, Exequiel Lacovsky, Keren Sasson, Daniel F. Wajner, 2021-07-01 Scholars of international relations generally consider that under conditions of violent conflict and war smuggling and trans border crime are likely to thrive In contrast this book argues that in fact it is globalisation and peaceful borders that have enabled transnational illicit flows conducted by violent non state actors including transnational criminal organizations drug trafficking organizations and terrorist cells who exploit the looseness and demilitarization of borderlands Empirically the book draws on case studies from the Americas compared with other regions of the world experiencing similar phenomena including the European Union and Southeast Europe the Western Balkans Southern Africa and Southeast Asia To explain the phenomenon in itself the authors

examine the type of peaceful borders and regimes involved in each case how strong each country is in the governance of their borderlands their political willingness to control their peaceful borders and the prevailing socio economic conditions across the borderlands
