Sticky Power Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Although modern civilization revolves around money the nature of money is paradoxical It is nothing more than a representation of and medium for decentralized networks of social trust but its production is controlled by highly centralized networks of firms places and governments and there is never enough of it to go around Moreover given that the creation of money as credit is based on expectations money is at its heart an instrument for human agency to change the future However the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history *Sticky Power* seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens Global Financial Networks to cast new light on the geography history politics and sociology of finance from the Middle Ages to the global financial crisis and beyond It shows that the power of finance is inherently sticky apparently new innovations such as offshore finance actually date back centuries and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly Haberly and Wójcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance one less reactively focused on regulation and more proactively focused on building new institutional systems with a long term sticky power of their own

and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today's companies have adopted the language but not often the mission of liberation and social change

Antarctica David Day, 2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it

Managing Intractable Conflicts Mensur Akgün, 2013 While the Cyprus and Transnistrian problems are just two of the numerous ongoing conflicts around the world we believe that a comparative study of these two cases can provide useful information for actors involved in conflict resolution The Global Political Trends Center GPoT Center of Istanbul Kültür University has been involved with almost all dimensions of the Cyprus conflict since the Center's formation During the past couple of years GPoT Center has organized several rounds of talks between Greek Cypriots and Turkish Cypriots entitled the Heybeliada Talks The meetings have been conducted following the strict Chatham House rules in a retreat on Heybeliada Island close to Istanbul and have become a symbol of GPoT Center's second track activities on Cyprus In addition GPoT Center has focused on several different dimensions of the Cyprus problem through its various publications We have come to understand that a comparative perspective is needed in order to better comprehend the psychology of the conflicting parties and formulate

innovative solution oriented approaches GPoT Center is proud to share this study that compares the Cyprus issue with the Transnistrian case deriving lessons from both We would like to present this book to those who are concerned not only with the two case studies but all those who are aware of the potential negative regional and international consequences of leaving these conflicts unresolved Page 7 *Separatism and the State* Damien Kingsbury, 2021-02-28 This book proposes and tests a theory of separatism to determine if there are key commonalities as to why separatist movements rise and what fuels them In the post Cold War period separatism has been on the rise Today there are more than 100 active separatist movements with around 70 of them engaging in violence This book focuses on examples from Europe the Middle East Africa and Asia to highlight the commonalities found across the case studies It examines the idea of separatism to better understand what drives movements to break away from preexisting states demonstrates the factors which produce both violent separatism and the rise of armed non state actors and shows the options for the resolution of such conflict based on considering claims for separatism from the perspectives of separatist movements This book will be applicable for undergraduate and postgraduate students of International Relations and International Politics as well as Conflict Peace Studies Anthropology and Post Colonial Studies
