A Geography of Infection Matthew R. Smallman-Raynor, Andrew D. Cliff, J. Keith Ord, Peter Haggett, 2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks

are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases

'Legal Pluriverse' Surrounding Multinational Military Operations Robin Geiß, Heike Krieger, 2019-12-19 The Legal

Pluriverse Surrounding Multinational Military Operations conceptualizes and examines the Pluriverse the multiplicity of rules that apply to and regulate contemporary multinational missions and the array of actors involved These operations are further

complicated by changes to the classification of the conflict and the asymmetry of obligations on participants Structured into five parts this work seeks through the diversity of its authorship to set out the web of legal regimes applicable to military operations including forces from more than one state It maps out the ways in which different regimes interact beginning with the laws of armed conflict and their relation to international humanitarian and human rights norms and extending through to areas like law of the sea and environmental law A variety of contributors systematically compile and take stock of the various legal regimes that make up the pluriverse assessing how these rules interact exposing norm conflicts areas of legal uncertainty or protective loopholes In this way they identify and evaluate approaches to better streamline the different applicable legal frameworks with a view to enhancing cooperation and thereby ensuring the long term success of multinational military operations

Everything in Its Place David B. Audretsch, 2015-03-02 Every city region and state wants to do better or at the very least not do worse Places have a strong and vigorous concern with and stake in generating a stronger economic performance This concern spans a broad spectrum of constituents and interests including business labor non profit organizations government and private residents However such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance the field of strategic management in business schools no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place Everything in Its Place

seeks to fill this intellectual void explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places. Several academic fields have generated a number of important theories, empirical findings and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance. Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers, these insights are integrated together into a coherent inclusive framework to guide and inform thought leaders and scholars in the strategic management of places.

Yojana, 2012 *Protests as Events* Ian R Lamond, Karl Spracklen, 2014-11-05 Can activism be considered a leisure activity? Can the Occupy movement, local campaigns for change and lone acts of personal resistance be understood as events? Within the field of Events Management, the content of events is generally analyzed within three categories: culture, sport or business. Such a typology can be helpful as a heuristic for interpretation and analysis within a commercial paradigm. However, this framework overlooks and depoliticizes a significant variety of events, those more accurately construed as protest. *Protests as Events* is the first book to explore activism as a leisure activity and protests as events using a fresh interpretation of event to develop a new critical politics of events and leisure. Bringing together a range of cutting edge research from around the world, it explores a variety of protests through the lens of events studies and leisure in order to understand how the study of events management might be conceptualized in the protest space.

Geographies of Journalism Robert E. Gutsche Jr., Kristy Hess, 2018-10-09 *Geographies of Journalism* connects theoretical and practical discussions of the role of geotechnologies, social media and boots on the ground journalism in a digital age to underline the complications and challenges that place making in the press brings to institutions and ideologies. By introducing and applying approaches to geography, cultural resistance and power as it relates to discussions of space and place, this book takes a critical look at how online news media shapes perceptions of locales. Through verisimilitude, storytelling methods and journalistic evidence shaped by sources and news processes, the press plays a critical role in how audiences shape interpretations of social conditions here and there and place responsibility for socio-political issues that appear in everyday life. Issues of proximity, place, territory, news myth, placemaking and power align in this book of innovative and new assessments of journalism in the digital age. This is a valuable resource for scholars across the fields of human geography, journalism and mass media.

Diplomatic Cultures and International Politics Jason Dittmer, Fiona McConnell, 2015-11-06 This volume offers an interdisciplinary and critical analysis of the role of culture in diplomatic practice. If diplomacy is understood as the practice of conducting negotiations between representatives of distinct communities or causes, then questions of culture and the spaces of cultural exchange are at its core. But what of the culture of diplomacy itself? When and how did this culture emerge and what alternative cultures of diplomacy run parallel to it, both historically and today? How do particular spaces and places inform and shape the articulation of diplomatic culture? This volume addresses these questions by bringing together a

collection of theoretically rich and empirically detailed contributions from leading scholars in history international relations geography and literary theory Chapters attend to cross cutting issues of the translation of diplomatic cultures the role of space in diplomatic exchange and the diversity of diplomatic cultures beyond the formal state system Drawing on a range of methodological approaches the contributors discuss empirical cases ranging from indigenous diplomacies of the Inuit Circumpolar Council to the European External Action Service the 1955 Bandung Conference the spatial imaginaries of mid twentieth century Balkan writer diplomats celebrity and missionary diplomacy and paradiplomatic narratives of The Hague The volume demonstrates that when approached from multiple disciplinary perspectives and understood as expansive and plural diplomatic cultures offer an important lens onto issues as diverse as global governance sovereignty regimes and geographical imaginations This book will be of much interest to students of public diplomacy foreign policy international organisations media and communications studies and IR in general
