to students of the geopolitics of energy international relations security and strategic studies energy studies as well as the media and with policymakers *Educart NEET 37 Years Biology Solved Papers (PYQs) Chapterwise and Topicwise for NEET 2025 Exam* Educart, Dr. Rakshita Singh, 2024-07-25 **The Shale Dilemma** Shanti Gamper-Rabindran, 2017-11-30 The US shale boom and efforts by other countries to exploit their shale resources could reshape energy and environmental landscapes across the world But how might those landscapes change Will countries with significant physical reserves try to exploit them Will they protect or harm local communities and the global climate Will the benefits be shared or retained by powerful interests And how will these decisions be made The Shale Dilemma brings together experts working at the forefront of shale gas issues on four continents to explain how countries reach their decisions on shale development Using a common analytical framework the authors identify both local factors and transnational patterns in the decision making process Eight case studies reveal the trade offs each country makes as it decides whether to pursue delay or block development Those outcomes in turn reflect the nature of a country's political process and the power of interest groups on both sides of the issue The contributors also ask whether the economic arguments made by the shale industry and its government supporters have overshadowed the concerns of local communities for information on the effects of shale operations and for tax policies and regulations to ensure broad based economic development and environmental protection As an informative and even handed account The Shale Dilemma recommends practical steps to help countries reach better more transparent and more far sighted decisions **Understanding New Security Threats** Michel Gueldry, Gigi Gokcek, Lui Hebron, 2019-02-21 This textbook examines non traditional forms of security and expands the notion of security to include non state actors and non human actors Proposing an expansive view of non traditional forms of security that go beyond traditionally recognized issues of threats to state and national territory this new textbook rests on the following premises traditional state centered threats such as nuclear proliferation and espionage remain a concern old and new threats combine and create interlocking puzzles a feature of wicked problems and wicked messes because of the global erosion of borders new developments of unconventional insecurity interact in ways that frustrate traditional conceptual definitions conceptual maps and national policies unconventional security challenges which have traditionally been seen as low politics or soft issues are now being recognized as hard security challenges in the twenty first century many of the so called new threats detailed here are in fact very old diseases gender violence food insecurity under development and crime are all traditional security threats but deeply modified today by globalization The chapters offer local and global examples and engage with various theoretical approaches to help readers see the bigger picture Solutions are also suggested to these problems Each chapter contains discussion questions to help readers understand the key points and facilitate class discussion This book will be of great interest to students of international security studies human security global politics and international relations **Rethinking Clusters** Luciana Lazzeretti, Francesco Capone, Annalisa Caloffi, Silvia Rita Sedita, 2021-05-13 Research on the topic of clusters and industrial

districts is very extensive. However, most of it has focused more on understanding the past than on trying to map out the future. The aim of this book is to fill this gap by identifying and discussing the main research topics that populate the current scientific debate and highlight the emergent lines of research that will constitute the future research agenda. It does so by drawing on the debate started with the Rethinking Clusters workshops, which in a short time have become a rich place for discussion among cluster scholars around the world. *Rethinking Clusters: Towards a New Research Agenda for Cluster Research* collects contributions from authoritative colleagues who cover a number of relevant and timely issues such as the territorial roots of radical innovation processes, new ways of understanding and measuring the role of place in economic development, path renewal, internationalization and entrepreneurship. The final section is devoted to the critical analysis of policies that support smart specialization. The chapters in this book were originally published as a special issue of the journal *European Planning Studies*. *Industrial Water Resource Management* Pradip K. Sengupta, 2017-09-06 Provides the tools that allow companies to understand the fundamental concepts of water resource management and to take proper action towards sustainable development. Businesses, communities and ecosystems everywhere depend on clean freshwater to survive and prosper. When the same source of water is shared for economic, social and environmental causes, it becomes the responsibility of every sector to develop a sustainable water strategy beneficial for all. This book offers a water resource management plan for industries that is directly implementable and consistent with the Water Framework Directives of different countries, with a special emphasis on developing countries. A plan that is economically efficient, socially equitable and environmentally sustainable. *Industrial Water Resource Management: Challenges and Opportunities for Efficient Water Stewardship* offers explicit technical and investment solutions, socioeconomic and legal instruments and recommendations for institutional restructuring. Written by a leading world expert in the field, it covers a wide range of topics including Source water assessment and protection, Water audit, industrial water footprint assessment, an evaluation of tools and methodologies, Corporate water disclosure methods and tools, Water stewardship by the industries, Stakeholder collaboration and engagement. New technologies enabling companies to better manage water resources. Given the well-known challenge of managing natural resources in a way that maximizes and sustains social welfare, this book provides an invaluable point of reference for applied researchers and policy makers working in water resources management. **Icebergs, Zombies, and the Ultra-Thin** Matthew Soules, 2021-05-04 Soules's excellent book makes sense of the capitalist forces we all feel but cannot always name. Icebergs, Zombies and the Ultra-Thin arms architects and the general public with an essential understanding of how capitalism makes property Required reading for those who think tomorrow can be different from today. Jack Self, coeditor of *Real Estates: Life Without Debt*. In *Icebergs, Zombies and the Ultra-Thin*, Matthew Soules issues an indictment of how finance capitalism dramatically alters not only architectural forms but also the very nature of our cities and societies. We rarely consider architecture to be an important factor in contemporary economic and political debates, yet

sparsely occupied ultra thin pencil towers develop in our cities functioning as speculative wealth storage for the superrich and cavernous iceberg homes extend architectural assets many stories below street level Meanwhile communities around the globe are blighted by zombie and ghost urbanism marked by unoccupied neighborhoods and abandoned housing developments Learn how the use of architecture as an investment tool has accelerated in recent years heightening inequality and contributing to worldwide financial instability See how investment imperatives shape what and how we build changing the very structure of our communities Delve into high profile projects like the luxury apartments of architect Rafael Viñoly's 432 Park Avenue Understand the convergence of technology finance and spirituality which together are configuring the financialized walls within which we eat sleep and work Includes dozens of photos and drawings of architectural phenomena that have changed the way we live Essential reading for anyone interested in architecture design economics and understanding the way our world is formed

Building a Capable State Ian Palmer, Nishendra Moodley, Susan Parnell, 2017-11-15 The sustainable development goals signed in 2016 marked a new phase in global development thinking one which is focused on ecologically and fiscally sustainable human settlements Few countries offer a better testing ground for their attainment than post apartheid South Africa Since the coming to power of the African National Congress the country has undergone a policy making revolution driven by an urgent need to improve access to services for the country's black majority A quarter century on from the fall of apartheid Building a Capable State asks what lessons can be learned from the South African experience The book assesses whether the South African government has succeeded in improving service delivery focusing on the vital sectors of water and sanitation energy roads public transport and housing Emphasizing the often overlooked role of local government institutions and finance the book demonstrates that effective service delivery can have a profound impact on the social structure of emerging economies and must form an integral part of any future development strategy A comprehensive examination of urban service delivery in the global South Building a Capable State is essential reading for students and practitioners across the social sciences public finance and engineering sectors

Transforming the War on Drugs Annette Idler, Juan Carlos Garzón Vergara, 2021-12-01 The war on drugs has failed but consensus in the international drug policy debate on the way forward is missing Amidst this moment of uncertainty militarized lenses on the global illicit drug problem continue to neglect the complexity of the causes and consequences that this war is intended to defend or defeat Challenging conventional thinking in defense and security sectors Transforming the War on Drugs constitutes the first comprehensive and systematic effort to theoretically conceptually and empirically investigate the impacts of the war on drugs The contributors trace the consequences of the war on drugs across vulnerable regions including South America and Central America West Africa the Middle East and the Golden Crescent the Golden Triangle and Russia It demonstrates that these consequences are global The war's local impacts on human rights security development and public health are interdependent with transnational illicit flows The book further reveals how these impacts

have influenced the positions of governments across these regions with significant ramifications for the international drug control regime Crucially it shows that at a time when global order is in flux critically evaluating the regime s securitization through the war on drugs provides key insights into other global governance realms **Critical Factors for Berth**

Productivity in Container Terminal Bo Lu, Shouyang Wang, 2016-09-27 This book is a comparative study of the critical factors in berth productivity in Chinese and South Korean container terminals It first defines the concept of berth productivity and then establishes a regression model to evaluate the productivity factor With the results obtained for the leading Asian container terminals it identifies the relationship between critical factors for berth productivity and their order of importance The findings provide guidelines for terminal operators to improve berth productivity *Transnational Gas*

Markets and Euro-Russian Energy Relations Andrei V. Belyi, 2016-04-29 This book analyses how transnational gas markets have evolved and impacted on EU Russia energy relations It examines how the political conflict surrounding Ukraine has accelerated a negative interdependence in the region with energy interdependence increasingly used as an instrument of diplomacy *Politics and Pan-Africanism* Dawn Nagar, 2019-12-12 Offering an examination of the diplomatic and economic regional power structures in Africa and their relationships with each other Dawn Nagar discusses the potential and future of pan Africanism The three primary regional economic communities RECs that are recognised by the African Union as the key building blocks of a united Africa are examined these are the Common Market for Eastern and Southern Africa COMESA the East African Community EAC and the Southern African Development Community SADC These RECS include Africa s major economies Egypt South Africa and Kenya but are also home to Africa s most conflict prone and volatile states the Democratic Republic of the Congo DRC Burundi South Sudan Somalia and Lesotho Providing a detailed overview of the current relationship between these power blocs this book provides insight into the current state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan Africanism [Biomass for Energy Country Specific Show](#)
