Learning Progressions in Geography Education Osvaldo Muñoz Solari, Michael Solem, Richard Boehm, 2016-07-30

This book informs an international audience of teachers, scholars, and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world. The book represents an important contribution to learning progressions research and practice. The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography. The book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices. As an approach to educational research, learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards. The book analyzes the general conditions of learning progressions within the context of a globalized world. Important themes are addressed such as knowledge acquisition in formal education, measuring learning progressions in informal settings, learning progressions for one curriculum standard or several standards, conditions to assess progression in the learning of facts, concepts, and skills, and multiple pathways for understanding or learning geography. The contributing authors are experienced scientists in the field from all around the world, giving specific insights into the practices of their countries. The book appeals to K-12 teachers, school administrators, policymakers, researchers in geography.

George Peabody College for Teachers, Division of Surveys and Field Services,1931 *After Piketty* Heather Boushey, J. Bradford DeLong, Marshall Steinbaum,2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much-debated book in its own right.

An Age of Accountability John L. Rury,2023-10-13 *An Age of Accountability* highlights the role of test-based accountability as a policy framework in American education. Even after very clear disappointments, no other policy framework has emerged to challenge its hegemony, and many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree.

River Dynamics Bruce L. Rhoads,2020-04-29 Rivers are important agents of change that shape the Earth's surface and evolve through time in response to fluctuations in climate and other environmental conditions. They are fundamental in landscape development and essential for water supply, irrigation, and transportation. This book provides a comprehensive overview of the geomorphological processes that shape rivers and that produce change in the form of rivers. It explores how the dynamics of rivers are being affected by anthropogenic change, including climate change, dam construction, and modification of rivers for flood control and land drainage. It discusses how concern about environmental degradation of rivers has led to the emergence of management strategies to restore and naturalize these systems and how river management techniques work best when coordinated with the natural dynamics of rivers. This textbook provides an excellent resource for students, researchers, and professionals in fluvial geomorphology, hydrology, river science, and environmental policy.
