McCordic, 2017-12-22 Urban population growth is extremely rapid across Africa and this book places urban food and nutrition security firmly on the development and policy agenda It shows that current efforts to address food poverty in Africa that focus entirely on small scale farmers to the exclusion of broader socio economic and infrastructural approaches are misplaced and will remain largely ineffective in ameliorating food and nutrition insecurity for the majority of Africans Using original data from the African Food Security Urban Network s AFSUN extensive database it is demonstrated that the primary food security challenge for urban households is access to food Already linked into global food systems and value chains Africa s supply of food is not necessarily in jeopardy Rather the widespread poverty and informal urban fabric that characterizes Africa s emerging cities impinge directly on households capacity to access food that is readily available Through the analysis of empirical data collected from 6 500 households in eleven cities in nine countries in Southern Africa the authors identify the complexity of factors and dynamics that create the circumstances of widespread food and nutrition insecurity under which urban citizens live They also provide useful policy approaches to address these conditions that currently thwart the latent development potential of Africa s expanding urban population Nature Sir Norman Lockyer, 1892 Index to

Michael O'Neal Campbell, 2022-05-18 This book examines the current literature and knowledge on the evolution and ecology of all the birds named as eagles with particular emphasis on the larger species It also examines the past and current relations between eagles and people including habitat change and conservation issues Eagle ecologies and conservation are currently seriously impacted by human activities such as industrialization urbanization pollution deforestation and hunting Some eagle species have consequently experienced extreme population changes There are however some positive developments Eagles

have a strong historic bond with human civilization due to their status as the world's most charismatic birds. Conservation policies have also been successful in repopulating some ecosystems with breeding eagles. Therefore, despite the complexity of this relationship, there may yet be hope for this unique species group, frequently rated as the kings of birds and symbolic of human power, ambition, royalty, nationality, and even concepts of God. It is hoped that this book will contribute to the further understanding of these unique and fantastic birds.

Housing, Fuel Poverty and Health Jonathan D. Healy, 2017-03-02

The first fully comparative study of fuel poverty across the EU, this work analyses the relationship between domestic energy efficiency, fuel poverty, and health. The book adopts a holistic approach, incorporating a large number of social and economic risk factors to present a large-scale cross-country longitudinal analysis. The book is unique in developing a new consensual methodology for calculating cross-country fuel poverty levels. Presenting a detailed econometric statistical analysis of EU fuel poverty, it details the results of an empirical investigation of EU housing conditions, affordability, and housing satisfaction. Identifying risk factors related to seasonal variations in mortality across the EU, it offers an empirical examination of health outcomes associated with fuel poverty, providing startling new evidence on fuel poverty in Southern Europe. *Housing, Fuel Poverty and Health* provides a powerful reference source for researchers and practitioners in the areas of energy, economics, public health, and epidemiology, housing, and social policy.
