The Journals of the Earth Science Teachers' Association (formerly Known as the Association of Teachers of Geology), Cumulative Index, 1997 *Structural Geology in Reservoir Characterization* M. P. Coward, T. Sezgin Daltaban, H. Johnson, 1998 The two main aims of this Special Publication are to capture the wide range of rapidly expanding research in this area which reflects the increasing importance of comprehensive structural characterization in static reservoir descriptions and to help promote synergy between the geosciences and petroleum engineering disciplines The first aim is addressed by the sixteen papers of the volume the majority of which cover a range of structural geological features particularly faulted and fractured reservoirs fault gouge properties fault seal potential and fluid flow simulation modelling in faulted and fractured reservoirs The papers draw heavily on experience obtained in the North Sea [Whitaker's Book List](#), 1988 **Structural Geology** David D. Pollard, Stephen J. Martel, 2020-07-23 Tackling structural geology problems today requires a quantitative understanding of the underlying physical principles and the ability to apply mathematical models to deformation processes within the Earth Accessible yet rigorous this unique textbook demonstrates how to approach structural geology quantitatively using calculus and mechanics and prepares students to interface with professional geophysicists and engineers who appreciate and utilize the same tools and computational methods to solve multidisciplinary problems Clearly explained methods are used throughout the book to quantify field data set up mathematical models for the formation of structures and compare model results to field observations An extensive online package of coordinated laboratory exercises enables students to consolidate their learning and put it into practice by analyzing structural data and building insightful models Designed for single semester undergraduate courses this pioneering text prepares students for graduates studies and careers as professional geoscientists **Quantitative Structural Geology** David D. Pollard, Stephen J. Martel, 2020-07-23 A pioneering single semester undergraduate textbook that balances descriptive and quantitative analysis of geological structures **Seismic Attributes for Prospect Identification and Reservoir Characterization** Satinder Chopra, K. J. Marfurt, 2007 Introducing the physical basis mathematical implementation and geologic expression of modern volumetric attributes including coherence dip azimuth curvature amplitude gradients seismic textures and spectral decomposition the authors demonstrate the importance of effective color display and sensitivity to seismic acquisition and processing Seismic attributes play a key role in exploration and exploitation of hydrocarbons In *Seismic Attributes for Prospect Identification and Reservoir Characterization* SEG Geophysical Developments No 11 the authors introduce the physical basis mathematical implementation and geologic expression of modern volumetric attributes including coherence dip azimuth curvature amplitude gradients seismic textures and spectral decomposition The authors demonstrate the importance of effective color display and sensitivity to seismic acquisition and processing Examples from different basins illustrate the attribute expression of tectonic deformation clastic depositional systems carbonate depositional systems and

diagenesis drilling hazards and reservoir characterization The book is illustrated generously with color figures throughout Seismic Attributes will appeal to seismic interpreters who want to extract more information from data seismic processors and imagers who want to learn how their efforts impact subtle stratigraphic and fracture plays sedimentologists stratigraphers and structural geologists who use large 3D seismic volumes to interpret their plays within a regional basinwide context and reservoir engineers whose work is based on detailed 3D reservoir models Copublished with EAGE **The Leading Edge**, 2007 Paleozoic Systems of the Rocky Mountain Region Mark W.
