

Physical Geology 1403 Lab

Graded for accuracy and completion

Name: _____

5. Use interpolation (estimation based on surrounding values) and extrapolation to estimate and label elevations of all points below that are not labeled. Then add contour lines using a contour interval of 100 feet. Notice how the 0-foot and 100-foot contour lines have already been drawn.

6. Sometimes your data will be in between the lines, and you need to interpolate. The letters X and Y on the map at right are not associated with any dot markers.

Use interpolation to give some elevation values between the lines.

What is the elevation at Y? 250

What is the elevation at Z? 400

5. Practice interpolating: Contour the map below. Use a 10 ft contour interval.

125	112	100	75	50	105	117
130	115	103	84	110	111	119
123	122	110	98	107	116	120
140	126	118	110	118	123	134

6. Circle the steepest region in the map above. How did you determine this?
