Reasoning Describe a data set for which the range is a better description than the interquartile range.

STEP 2 Use the box plot to find the range and the interquartile range.

$$\text{range} = \underline{35} - \underline{5} = \underline{30}$$

$$\text{interquartile range} = \underline{18} - \underline{15} = \underline{3}$$

5 of the seven prices are within the IR

The other two prices are much higher or lower.

So, the IR better describes the data because the

Range makes it appear that the data values vary more than they actually do.
