

Thomson's Strategy in 2002-3 by Michael Goossens: increasingly efficient education

Answer for last question:

1. Explain Thomson's business model.

Thomson's business model is superior to competing ones, especially that of the general publishing one, largely due to its focus on the highly educational field. This market has relatively no barriers to entry, so numerous individual publishers (the general publishing ones) produce also sufficiently competitive titles (but not necessarily the best) and compete further with segments for them. Through a portfolio that increases regularly, they are a constant and solid presence, making the buying of educational materials a much easier decision. With regular changes and focused growth through various acquisitions, Thomson developed an exceptional educational presence.

In addition to that, the increasing volume of books within the industry enabled Thomson to focus on high-quality offerings, but not on price competition, as their product is not what competing companies offer. In addition, the focus on high educational subjects, such as writing, helped for creating additional segments, such as business writing materials, based on educational and research literature. The very strong writing market for business texts, that allowed Thomson to target higher positions in such niche publishing categories, demonstrated that it is an important niche for books. The quality of books has become an important competitive thing that Thomson emphasized, as compared to other quality-focused publishers, such as Wiley, Thomson's high educational and business departments were successful in all segments by maintaining constant competitive research, especially in the writing market.

As stressed by the Thomson executives, the focus through different and more books has to

Is the Answer Christina T. Russo, Cathy Swan, 2015-01-22 Today's tech savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st century tools and know how necessary for educators to appeal to and challenge students to learn and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication attributes of their lives outside of education via the integration of cutting edge technologies and new media in the library or classroom serve to ignite creativity, curiosity and critical thinking? This book shows how you can make use of non traditional tools such as popular social networks, collaborative technologies and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy to follow blueprint for using collaborative techniques, innovation and teaching for creativity to achieve the new learning paradigm of self directed learning such as flipping the classroom or library. Readers of this book will find concrete step by step examples of proven lesson plans, collaborative models and time saving strategies for the successful integration of American Association of School Librarians AASL standards. The authors, both award winning teachers, explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.
