Distance Learning, E-Learning and Blended Learning in Mathematics Education Jason Silverman,Veronica Hoyos,2018-07-20 This book builds on current and emerging research in distance learning e learning and blended learning Specifically it tests the boundaries of what is known by examining and discussing recent research and development in teaching and learning based on these modalities with a focus on lifelong mathematics learning and teaching The book is organized in four sections The first section focuses on the incorporation of new technologies into mathematics classrooms through the construction or use of digital teaching and learning platforms The second section presents a wide range of perspectives on the study and implementation of different tutoring systems and or computer assisted math instruction The third section presents four new innovations in mathematics learning and or mathematics teacher education that involve the development of novel interfaces for communicating mathematical ideas and analyzing student thinking and student work Finally the fourth section presents the latest work on the construction and implementation of new MOOCs and rich media platforms developed to carry out specialized mathematics teacher education **e-Learning, e-Education, and Online Training** Shuai Liu,Matt Glowatz,Marco Zappatore,Honghao Gao,Bing Jia,Alberto Bucciero,2018-06-29 This book constitutes

the proceedings of the 4rd International Conference on e Learning e Education and Online Training eLEOT 2018 held in Shanghai China in April 2018 The 49 revised full papers presented were carefully reviewed and selected from 120 submissions They focus on most recent and innovative trends in this broad area ranging from distance education to collaborative learning from interactive learning environments to the modelling of STEM Science Technology Mathematics Engineering curricula *Educational Research and Innovation Critical Maths for Innovative Societies The Role of Metacognitive Pedagogies* Mevarech Zemira, Kramarski Bracha, 2014-10-28 This report looks at a number of published studies on mathematics education that try to understand which education and skills are appropriate for innovative societies

ECEL 2016 - Proceedings of the 15th European Conference on e- Learning , Proceedings of the 15th European Conference on e Learning ECEL 2016 *14th International Conference on Theory and Application of Fuzzy Systems and Soft Computing - ICAFS-2020* Rafik A. Aliev, Janusz Kacprzyk, Witold Pedrycz, Mo Jamshidi, Mustafa Babanlı, Fahreddin M. Sadikoglu, 2021-01-04 This book presents the proceedings of the 14th International Conference on Applications of Fuzzy Systems Soft Computing and Artificial Intelligence Tools ICAFS 2020 held in Budva Montenegro on August 27 28 2020 It includes contributions from diverse areas of fuzzy systems soft computing AI tools such as uncertain computation decision making under imperfect information deep learning and others The topics of the papers include theory and application of soft computing neuro fuzzy technology intelligent control deep learning machine learning fuzzy logic in data analytics evolutionary computing fuzzy logic and artificial intelligence in engineering social sciences business economics material sciences and others **Mathematics and Technology** Gilles Aldon, Fernando Hitt, Luciana Bazzini, Uwe Gellert, 2017-04-05 This volume collects most recent work on the role of technology in mathematics education It offers fresh insight and understanding of the many ways in which technological resources can improve the teaching and learning of mathematics The first section of the volume focuses on the question how a proposed mathematical task in a technological environment can influence the acquisition of knowledge and what elements are important to retain in the design of mathematical tasks in computing environments The use of white smart boards platforms as Moodle tablets and smartphones have transformed the way we communicate both inside and outside the mathematics classroom Therefore the second section discussed how to make efficient use of these resources in the classroom and beyond The third section addresses how technology modifies the way information is transmitted and how mathematical education has to take into account the new ways of learning through connected networks as well as new ways of teaching The last section is on the training of teachers in the digital era The editors of this volume have selected papers from the proceedings of the 65th 66th and 67th CIEAEM conference and invited the correspondent authors to contribute to this volume by discussing one of the four important topics The book continues a series of sourcebooks edited by CIEAEM the Commission Internationale pour l'étude et l'amélioration de l'Enseignement des Mathématiques International Commission for the Study and Improvement of Mathematics Education **Dynamic Lecturing**

Christine Harrington, Todd D. Zakrajsek, 2023-07-03 Is the lecture an outmoded teaching method that inhibits active learning or is it a potentially powerful tool that is an essential part of every teacher's repertoire? This book presents up-to-date research on the different types of lecture, on what constitutes effective lecturing, and on the impact of lecturing when done appropriately and well. It fills the void in professional development resources on how to lecture, validating the practice when it's aligned with the educational mission of creating engaged learning environments. Christine Harrington and Todd Zakrajsek demonstrate that rather than lecture and active learning being mutually exclusive, or either/or propositions, the effectiveness of the former can be greatly enhanced when combined with active learning techniques through what they define as dynamic lecturing, and provide context about the need to balance these approaches to meet the needs of students as they progress from novice to advanced learners. They present a range of strategies that enhance student learning during lectures. They open each chapter with the evidence behind each lecturing strategy they describe and conclude with practical suggestions for quick application in the classroom. They offer readers the lecture planning and evaluation tools for reworking their lectures in ways that provide high-level engagement and achievement for their students. The opening section of the book explores the benefits of lecturing and describes the different modalities of lecture with an assessment of the advantages and disadvantages of each. The second section focuses on educational strategies to enhance the lecture, including among others, activating prior knowledge, emphasizing important points effectively, using multi-media, making concepts meaningful via examples, and the importance of retrieval practice. Each covers the underlying theory and research and advice on how to align the engagement techniques with instructional goals. The book concludes with guidance on effective planning for lecturing and helping chairs, administrators, or peers engage in effective evaluation of the lecture. This is a dynamic resource for all faculty interested in revitalizing their teaching. The strategies are succinct, easy to incorporate into lectures, and done well, will have immediate impact and increase student mastery of course content. *Learning and Teaching Early Math*

Douglas H. Clements, Julie Sarama, 2020-12-29 The third edition of this significant and groundbreaking book summarizes current research into how young children learn mathematics and how best to develop foundational knowledge to realize more effective teaching. Using straightforward, practical language, early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers understand children's level of mathematical understanding and lead to better teaching. By focusing on the inherent delight and curiosity behind young children's mathematical reasoning, learning trajectories ultimately make teaching more joyous, helping teachers understand the varying levels of knowledge exhibited by individual students; it allows them to better meet the learning needs of all children. This thoroughly revised and contemporary third edition of *Learning and Teaching Early Math* remains the definitive research-based resource to help teachers understand the learning trajectories of early mathematics and become confident, credible professionals. The new edition draws on numerous new research studies, offers expanded international examples, and includes updated illustrations.
