

Tata Steel Ltd

Raise estimates & PT as Europe continues to pick up, while India stabilizes; Could be PCF positive in FY15E

TATA's leverage to a European recovery goes beyond steel EBITDA/T, in our view. Reported EPM could improve sharply in two rates scenarios, and the higher EBITDA from Europe would likely result in TATA being PCF positive in FY15E (even as we hold in capex of ~Rs120bn and no asset sales). Stronger equity markets in Europe combined with higher interest rates should also lead to a better picture, whether from debtors. We increase TATA Europe EBITDA for FY15E to ~\$700m (EBITDA/T ~\$11/T) from ~\$600m earlier. We see large upside risks to our European estimates, if a) current spreads were to narrow for the full year, and b) if long product demand recovery starts in Q1'16E. We raise our PT to Rs250 (based on FY15 EBITDA).

- Even if current spreads do not narrow, there is significant upside to our TATA Europe estimates. January was a unique month, as the rates that spreads widened materially in Europe as steel prices increased, even as raw material prices were falling. We do not expect this to continue, but we see upside risks to our estimates, primarily driven by demand, particularly Long steel. TATA has mothballed capacity in Long steel in UK, and continued demand revival of these capacities could drive significant upside to our Street-high estimates. Every ~100T increase in EBITDA effectively adds ~\$0.4 to our PT.
- India should remain steady, we see little risk of any disruption from Bhak Communications. We do not see any disruption to TATA's iron ore operations. Our average discounts are not building in a big domestic recovery and hence we expect discount to import parity price to remain, though narrow. While there are worries about a steep iron ore price fall as HD driving global HRC steel prices below \$100/T, we would highlight that a) weaker D-OX remains supportive for local prices, and b) there is upside risk to ~~FFR/Steel demand estimates~~.
- Even with Rs120bn capex estimates, TATA could turn PCF positive. We are not building in asset sales and the group investment and Dividend Payout are embedded options, values in the balance sheet which could be monetized if required. We do not give any value to them.
- What to expect in earnings on Feb 12: We expect consolidated EBITDA of Rs267bn, 1% company coupled consensus of Rs277bn while our TATA Europe EBITDA/T is at ~\$11.5/T consensus at ~\$10/T.
- Remains OW: TATA remains the most levered stock in any European recovery and we believe a recovery is NOT yet priced into the stock.
