

Industrial Visit REPORT

Sub:- Industrial visit in Microtek Inverters at peeragarhi

Guests: Mr.Col. Balraj

ECE Faculty Members went for visit: Mr. Kamal and Mr. Harsh

The industrial visit was held on 29th march 2014. Initially there was a presentation on the domestic and global opportunities for the ECE students & various other aspects of the electronics industry in India & abroad. There were eminent personalities like Mr. Tejveer Singh & Col. Balraj Anand who graced the occasion with their presence.

They also shed light on the various policies & steps taken in the direction to flourish the Indian Electronics Industry & make it compete with the international market.

Thereafter at 1pm, students were taken to the peeragarhi Industrial area to visit the Microtek Inverters, after which we went to the Okaya Battery Centre and R&D dept.

At our industrial visit we studied about the following points:

- Validation & testing techniques.
- Research & development breakthrough.
- Manual & automatic testing methods.
- Insight of overloading problems/defects.
- Inverter & UPS mode working.
- Different major components used in the making of inverters.
- Brief introduction to the new product to be launched in the market such as stabilizers etc.
- Batch testing.
- A short video was shown how the batteries are manufactured on the assembly lines.

At around 4 pm visit was over

Advancing Learning Factories: Enabling Future-Ready Skills Louis Louw, Vera Hummel, Imke de Kock, Konrad von Leipzig, 2025-09-30 Industrial companies aim to offer unique products and service bundles to their customers. At the same time they must shape their value adding processes to address current challenges such as digitalization, intelligent systems, resilience, human centredness and sustainability. Managing these necessary transition processes relies heavily on staff competency. Ultimately well prepared students, qualified engineers and workers must plan and implement the required steps. Qualification processes must be oriented towards these practical requirements. Thus appropriate learning systems for developing the competencies needed to set up and operate new production processes are crucial for the factory of the future. Learning factories are recognized as a promising path to meet these future needs. They provide an interactive learning environment where pilot or real scale processes and technologies are in place allowing direct access to the product creation process, product development, manufacturing, quality management, logistics. Learning factories are based on a didactical concept that emphasizes experimental and problem based learning. The continuous improvement philosophy is facilitated by the participants own actions and interactive involvement. Through the learning factory various stakeholders can grasp the complex technical and organizational interrelationships of today's industrial environment and acquire the competencies to systematically improve it. The Conference on Learning Factories CLF provides a regular platform for academic, educational and industrial stakeholders to exchange the latest knowledge and developments in this domain. The Conference on Learning Factories CLF is the annual conference of the International Association of Learning Factories IALF attracting top academics and researchers in the field of learning factories to meet, engage and share their R D findings. The goal of the CLF is to promote cooperation among members to achieve excellence in teaching and research in the field of learning factories. Each year the conference attracts about 130 participants worldwide. The 15th Conference on Learning Factories CLF was hosted by the Department of Industrial Engineering at Stellenbosch University in the beautiful town of Stellenbosch, South Africa. The conference covered the following main topics: technology implementation and evaluation related to learning factories; learning and didactic processes and evaluation related to learning factories; learning factory business models and cooperation; industry and academic learning factory concepts and infrastructure; and learning factories for sustainability and resilience.
