Sleep and its Disorders in Children and Adolescents with a Neurodevelopmental Disorder Gregory Stores, 2014-10-27 A guide based on modern research about managing sleep disturbances in childhood neurodevelopmental disorders, each of which is considered separately. **Depression and the Divine** David C. Wilson, 2018-12-21 David Wilson's initial research into the phenomenon of prophecy in the Hebrew Bible suggested that many of the passages featuring prophets and hitherto considered to be bizarre myths or much edited collections of traditions were in fact sequences of dreams. Moreover, it was possible to compare the structure of these sequences with the structure of a night's sleep hypnogram as revealed by modern sleep research to demonstrate that the sleeper was depressed. This characteristic depressive sleep architecture was then used to show that three characters in particular, Elijah, Jonah, and Adam, compared in the New Testament with Jesus, were all in fact depressed. Quite naturally, this raised further questions concerning the nature of Jesus himself: Was he merely a prophet? If he wasn't, how did he differ? If he was depressed, how was he able to function and succeed in his mission when Elijah and Jonah clearly had such great difficulties? These and other questions are raised throughout this book, and many of them are not new, but they are, however, changed forever when asked against a contextual background of altered states of consciousness (ASCs) and dreamform, in particular. *Sleep Apnea and Snoring E-Book*
