Co-treatment of Septage and Faecal Sludge in Sewage Treatment Facilities Dorai Narayana,2020-04-15 Over the past few years on site sanitation has been widely promoted as a solution which can be quickly implemented to address sanitation issues and it is gaining traction As such treatment of the contents emptied from on site containments has become a pressing issue While dedicated treatment facilities for this purpose have been advocated co treating these wastes in sewage treatment facilities is a promising option which many countries have implemented or are exploring This option maximises the utilisation of city infrastructure In cases where the existing sewage treatment facilities are underutilised co treatment presents a ready solution for managing fecal sludge and septage In spite of co treatment being a well known practice in many countries it remains clouded in uncertainty especially regarding the technical advisability and potential risks of co treating fecal sludge or septage in sewage treatment plants Planners and decision makers are often very apprehensive in considering co treatment As a result the opportunity to better utilise available infrastructure for co treatment of sludge is often being missed Meanwhile there are also many cases where co treatment has been tried either successfully or otherwise but it has not been possible to draw conclusions from these to guide the way forward This guide book explores some of the basic principles behind sewage treatment and how it may be impacted by co treatment of wastes from on site containments to try to throw some light on how co treatment could be considered in an incremental manner recognising risks and mitigating them It is intended to facilitate a better understanding among planners engineers decision makers and technical

practitioners and to help them evaluate and consider the option of co treatment

Water Governance in the Arab Region United Nations Development Programme. Regional Bureau for Arab States, 2013 The publication looks at the alarming current water situation in the Arab countries with demand for water increasing exponentially as a result of rapid population expansion changing lifestyles urbanisation and the pressures of economic growth The high dependency of the region on transboundary waters and growing competition over water use further intensifies the water crisis Furthermore the repercussions of climate change will exacerbate these ongoing challenges This water crisis is at its core an issue of governance often managed by fragmented government institutions with inadequate capacities leading to inefficient provision of potable water and sanitation services Lastly the Arab region's current political and economic transformations present an opportunity to advance water governance reform while effective water governance systems can in turn catalyse region wide aspirations for overall good governance and sustainable human development

The Report: Qatar 2020 Oliver Cornock, Qatar has demonstrated considerable resilience in recent years successfully developing new homegrown industries while at the same time strengthening its global ties Although Covid 19 has introduced significant economic uncertainties in 2020 a rapid response from Qatar's authorities to curb the effects of the virus should stand the nation's economy in good stead over the medium and long term

The Report: Qatar 2025 Oliver Cornock, Qatar is channeling its hydrocarbons wealth into long term economic transformation with diversification accelerating after the FIFA 2022 World Cup In 2024 non oil sectors accounted for over 60% of GDP led by tourism logistics and financial services The energy sector also continues to be a boon for the economy as Qatar's abundant natural gas reserves and its liquefied natural gas exports aid foreign direct investment inflows
