A Decade of the Berkeley Math Circle Zvezdelina Stankova, Tom Rike, 2015-02-03 Many mathematicians have been drawn to mathematics through their experience with math circles The Berkeley Math Circle BMC started in 1998 as one of the very first math circles in the U S Over the last decade and a half 100 instructors university professors business tycoons high school teachers and more have shared their passion for mathematics by delivering over 800 BMC sessions on the UC Berkeley campus every week during the school year This second volume of the book series is based on a dozen of these sessions encompassing a variety of enticing and stimulating mathematical topics some new and some continuing from Volume I from dismantling Rubik s Cube and randomly putting it back together to solving it with the power of group theory from raising knot eating machines and letting Alexander the Great cut the Gordian Knot to breaking through knot theory via the Jones polynomial from entering a seemingly hopeless infinite raffle to becoming friendly with multiplicative functions in the land of Dirichlet M bius and Euler from leading an army of jumping fleas in an old problem from the International Mathematical Olympiads to improving our own essay writing strategies from searching for optimal paths on a hot summer day to questioning whether Archimedes was on his way to discovering trigonometry 2000 years ago Do some of these scenarios sound bizarre having never before been associated with mathematics Mathematicians love having fun while doing serious mathematics and that love is what this book intends to share with the reader Whether at a beginner an intermediate or an advanced level anyone can find a place here to be provoked to think deeply and to be inspired to create In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession Titles in this series are co published with the Mathematical Sciences Research Institute MSRI

The Sky Is Smiling Kevin Munro, 2015-04 I was released from an in patient mental health ward in early March 2006 A trophy pictured in the preface of this book displays the date July 23 2006 as the initial USA competition poetry award That date marks the deadline of the period required for a poem to be created entered and judged All that was left for application after my 20 years of post grad training was creative writing My hidden hope was to offer in a real way an apology via deed to all those who encountered me when I was unwell There is something strange regarding that period s legal progress since society so easily ignores this as dealing with madness My elderly mother watched as my life appeared to unravel but always offered support In 2009 as she lay upon her deathbed in hospital she held the first volume for which she was my sounding board She smiled and said Well at least you have a little hope appearing now These works you hold are the collated works of this period of hurtful outpour and are continuous from early 2006 until late 2014
