Hosticka, 2006-01-14 One of the main trends of microelectronics is toward design for integrated systems i e system on a chip SoC or system on silicon SoS Due to this development design techniques for mixed signal circuits become more important than before Among other devices analog to digital and digital to analog converters are the two bridges between the analog and the digital worlds Besides low power design technique is one of the main issues for embedded systems especially for hand held applications Modular Low Power High Speed CMOS Analog to Digital Converter for Embedded Systems aims at design techniques for low power high speed analog to digital converter processed by the standard CMOS technology Additionally this book covers physical integration issues of A/D converter integrated in SoC i e substrate crosstalk and reference voltage network design

Introduction to Image Stabilization Scott W. Teare, Sergio R. Restaino, 2006 The use of image stabilization has grown to the point that it is now a common component of modern optical systems for imaging communications and remote sensing applications The benefits of image stabilization to astronomical research alone are so rich that it is common for astronomical telescopes built over the last century to be retrofitted with fast steering mirrors and tip tilt sensors to extend their useful lifetimes This text provides the basics of image stabilization starting with a consideration of the cause of image blurring and an introduction to the components commonly used in constructing a stabilized imaging system With this foundation an example image stabilized system is described and used to introduce some of the important parameters in evaluating the performance of image stabilization systems As image stabilization systems are key components of adaptive optics systems the more sophisticated sensing and correction devices used in this area are briefly addressed Rather than being a mathematical rigorous treatment of image stabilization it provides the basic ideas in an easy to read format
