Defining Management Lars Engwall,Matthias Kipping,Behlül Üsdiken,2016-06-10 Defining Management charts the expansion of management as an idea and practice from a time when it was limited to churches and households to its current ubiquity focusing in particular on the role of business schools consultants and business media in this process How did an entire industry develop around business schools consultants and business media who are now widely considered the authorities regarding best management practice This book shows how these actors on their own and in interaction became taken for granted and gained such definitional power over management and managers expanded across the globe from often modest and not always respected origins and impacted and continue to impact businesses and increasingly the broader economic and social context Building on extant and some new research the book is unique in bringing together issues and actors that have been examined elsewhere separately Any student or professional of management interested in the evolution of their field or the rise of business schools consultants and business media will find this book both novel and thought provoking

A Primer on Environmental Sciences Matthew N. O. Sadiku,Uwakwe C. Chukwu,Olaniyi D. Olaleye,2022-02-09 In a modern society it is easy to forget that our society depends largely on the environmental processes that govern our world Environment refers to an aggregate of surroundings in which living beings such as humans animals and plants live and non living things exist It includes air water land living organisms and materials surrounding us The environment is an important part of our daily lives Environmental issues are now part of every career path and employment area Environmental science is an interdisciplinary field that applies principles from all the known technologies and sciences to study the environment and provide solutions to environmental problems It is the study of how the earth works and how we can deal with the environmental issues we face There is an ever demanding need for experts in this field because the environment is responsible for making our world beautiful and habitable For this reason environmental science is now being taught at high schools and higher institutions of learning Education on environmental science will empower the youths to take an active role in the world in which they live

Design Science Vladimir Hubka,W.Ernst Eder,2012-12-06 It is the aim of this study to present a framework for the design of technical systems This can be achieved through a general Design Science a knowledge system in which products are seen as objects to be developed within engineering design processes The authors have developed this design science from a division of the knowledge system along two axes One deals with knowledge about technical systems and design processes while the other presents descriptive statements Relationships among the various sections of the knowledge system are made clear Well known insights into engineering design the process its management and its products are placed into new contexts Particular attention is given to various areas of applicability Widespread use throughout is made of easily assimilated diagrams and models
