Schneider,2013-07-15 This first extensive study of the practice of blood transfusion in Africa traces the history of one of the most important therapies in modern medicine from the period of colonial rule to independence and the AIDS epidemic The introduction of transfusion held great promise for improving health but like most new medical practices transfusion needed to be adapted to the needs of sub Saharan Africa for which there was no analogous treatment in traditional African medicine This otherwise beneficent medical procedure also created a royal road for microorganisms and thus played a central part in the emergence of human immune viruses in epidemic form As with more developed health care systems blood transfusion practices in sub Saharan Africa were incapable of detecting the emergence of HIV As a result given the wide use of transfusion it became an important pathway for the initial spread of AIDS Yet African health officials were not without means to understand and respond to the new danger thanks to forty years of experience and a framework of appreciating long standing health risks The response to this risk detailed in this book yields important insight into the history of epidemics and HIV AIDS Drawing on research from colonial era governments European Red Cross societies independent African governments and directly from health officers themselves this book is the only historical study of the practice of blood transfusion in Africa **Wonder-Full Education** Kieran Egan,Annabella I. Cant,Gillian Judson,2013-07-24 For many children much of the time their experience in classrooms can be rather dull and yet the world the school is supposed to initiate children into is full of wonder This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults teachers and curriculum makers and how to keep it alive in children Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms The authors do not wax flowery they present strong arguments based on either research or precisely

described experience and demonstrate how this argument can be seen to work itself out in daily practice The emphasis is not on ways of evoking wonder that might require virtuoso teaching but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms International Human Rights Philip Alston, Ryan Goodman, 2013 The successor to International human rights in context law politics and morals **Marine Fisheries Review** ,2015 **Black Metal** Dayal Patterson, 2013-11-25 Here is the most comprehensive history yet of this fascinating offshoot of extreme heavy metal **Journal of the Society of Arts** ,1859 *Comprehensive Guide to CDS OTA Exam* Disha Experts, 2020-08-18 **National Missile Defence and the politics of US identity** Natalie Bormann, 2013-07-19 Why adopt a poststructural lens for the reading of the military strategy of national missile defence NMD No doubt when contemplating an attack on US territory by intercontinental ballistic missiles consulting Michel Foucault and critical international relations theory scholars may not seem the obvious route to take The answer to this lies in another question why has there been so much interest and continuous investment in NMD deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost Posed in this manner the question cannot be answered on its own terms the terms given in official accounts of NMD that justify the system s significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios Instead this book argues that the preferences leading to NMD deployment must be understood as satisfying requirements beyond strategic approaches and issues In turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about NMD and suggests reading the strategy in terms of US identity Presented as an analysis of discourses on threats to national security around which the need for NMD deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and US foreign policy speak directly to each other It seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice 2024-25 Geography India and World based on NCERT VI-XII one liner YCT Expert Team, 2024 25 Geography India and World based on NCERT VI XII one liner 160 295
