Organizing and Managing the Language Arts Block Lesley Mandel Morrow, 2003-01-01. This book offers essential guidance to preservice and inservice teachers seeking to create, revise, or add new strategies to the teaching of the language arts block. The focus is on how to implement effective strategies in the context of a well-planned classroom and a smoothly choreographed daily schedule. In a series of vivid case studies, Lesley Mandel Morrow brings to life the methods used by exemplary teachers to create rich, student-friendly learning environments for children in grades K-4. No component of organizing the language arts block is omitted, including setting up and running classroom learning centers, assessing different instructional needs, conducting whole-class and small-group meetings, and linking language arts to content-area instruction. Enhancing the practical utility of the book are sample daily schedules and classroom management tips for each grade level, along with dozens of reproducible learning activities, lesson plans, and assessment and record-keeping tools.

Optimizing Student Learning Betty Ziskovsky, Joe Ziskovsky, 2010-09-06. This book is a fictionalized account of one teacher's effort in applying process-improvement principles to her teaching practices. Lisa's story is based on actual practice and resulted in an innovative application of the lean waste-elimination approach to classroom teaching and learning. It also resulted in Lisa completing the delivery of her entire curriculum in the school year in a way that allowed students to master the material, as evidenced by significant growth in student performance scores on the standardized achievement test in her content area. The methods and tools described are based on proven lean techniques and sound education practice. Lean is a program of organizational improvement that empowers each and every worker in a school system, from student through superintendent, to increase his or her personal performance and job satisfaction through process improvement. Lean engages everyone in streamlining his or her work processes by identifying and eliminating the steps within each process that are wasteful, unnecessary, or do not contribute value to and may even prohibit the person from doing or completing the work. By incorporating a value-adding approach, system-wide schools can become more efficient in their operations and more effective at delivering their services, optimize the learning performance of all students, and create a culture of success and satisfaction for all. Includes an introduction by Norman Bodek. An inspiring story of how good management can work wonders in the classroom. Great jargon-free examples.
