*Tableau Training Manual Version 9.0 Advanced* Larry Keller, 2015-12-02 Now in its 6th edition with version 9.0 my goals remain the same to write this document through the eyes of the average and advanced users Early on the average Tableau user can be overwhelmed by the array of features and functions that repeatedly use menus or right click options to yet another set of choices This manual is intended for new users who range from days to a few months It was not written for those who seek Tableau Certification s or highly advanced users It does contain some lessons that introduce advanced material to enable the user to see what the future can be with Tableau The manual begins at a level geared to the average user and is written in simple language unaffected by a need to promote extraneous features I believe and our customers tell me that this manual provides the best examples and descriptions in a step by step process that is the most efficient way to learn about Tableau An array of Tableau Packaged Workbooks software examples complements the written word in the manual These Workbooks present the end result of following the lessons step by step
