Neumann,N. C. Westergard-Nielsen,2012-12-06 This volume consists of papers presented at a conference on labor mar ket
theory held in August 1982 at Sandbjerg a manor house situated in S0nderjylland owned by University of Aarhus The
conference was ar ranged to mark the start of a labor market research project utilizing the first Danish longitudinal data set
The conference was meant to present a survey of the recent developments within labor market theory where unemployment
at a given time is seen as a result of flows of in dividuals between the various labor market states Consequently al most all
papers deal with aspects of transitions on the labor market The first paper by Andersen discusses from a statisticians point of
view how it is possible to analyze longitudinal data on labor market dynamics using statistical models for multivariate
counting processes Models including general calendar time specific intensities and models specifying the distribution of spell
lengths as well as their combina tions are included Finally it is demonstrated how the effect of exo genous endogenous and
other time dependent variables can be model led This paper does also contain an example of the application of the model
