The Lost Archive Marina Rustow,2020-01-14 A compelling look at the Fatimid caliphate s robust culture of documentation The lost archive of the Fatimid caliphate 909 1171 survived in an unexpected place the storage room or geniza of a synagogue in Cairo recycled as scrap paper and deposited there by medieval Jews Marina Rustow tells the story of this extraordinary find inviting us to reconsider the longstanding but mistaken consensus that before 1500 the dynasties of the Islamic Middle East produced few documents and preserved even fewer Beginning with government documents before the Fatimids and paper s westward spread across Asia Rustow reveals a millennial tradition of state record keeping whose very continuities suggest the strength of Middle Eastern institutions not their weakness Tracing the complex routes by which Arabic documents made their way from Fatimid palace officials to Jewish scribes the book provides a rare window onto a robust culture of documentation and archiving not only comparable to that of medieval Europe but in many cases surpassing it Above all Rustow argues that the problem of archives in the medieval Middle East lies not with the region s administrative culture but with our failure to understand preindustrial documentary ecology Illustrated with stunning examples from the Cairo Geniza this compelling book advances our understanding of documents as physical artifacts showing how the records of the Fatimid caliphate once recovered deciphered and studied can help change our thinking about the medieval Islamicate world and about premodern polities more broadly   *Counter-Archive* Paula Amad,2010-09-23 Tucked away in a garden on the edge of Paris is a multimedia archive like no other Albert Kahn s Archives de la Plan te 1908 1931 Kahn s vast photo cinematographic experiment preserved world memory through the privileged lens of everyday life and Counter Archive situates this project in its biographic intellectual and cinematic contexts Tracing the archive s key influences such as the philosopher Henri Bergson the geographer Jean Brunhes and the biologist Jean Comandon Paula Amad maps an alternative landscape of French cultural modernity in which vitalist philosophy cross pollinated with early film theory documentary film with the avant garde cinematic models of temporality with the early Annales school of history and film s appropriation of the planet with human geography and colonial ideology At the heart of the book is an insightful meditation upon the transformed concept of the archive in the age of cinema and an innovative argument about film s counter archival challenge to history The first comprehensive study of Kahn s films Counter Archive also offers a vital historical perspective on debates involving archives media and memory   *Web Archives and Web Archiving* Asger Harlung,2025-04-23 Web archives are repositories of content preserved from the World Wide Web not to be confused with other types of archives that offer services or content online Web archives preserve content that otherwise tends to disappear or change rapidly which probably makes them the most important initiative towards preservation of cultural heritage in our age Never before have the actions ongoings sentiments trends decision processes in politics business and industry institutions news media entertainment providers interest groups and individuals been documented or preserved at the level of detail offered by ongoing and systematic

preservation of the Web with content from all levels of society This book strives to present the underlying methods and reasons for preserving web content with a focus on the principles rather than specific methods that may become obsolete almost as quickly as web pages may disappear and on detailing the nature of the archived results with its potentials and pitfalls **Staging the Archive** Ernst van Alphen,2014-11-15 Dedicated to art practices that mobilize the model of the archive Staging the Archive demonstrates the ways in which such archival artworks probe the possibilities of what art is and what it can do Through a variety of media methodologies and perspectives the artists surveyed here also challenge the principles on which the notions of organization evidence and documentation are built The earliest examples of the modern archival artwork were made in the 1930s but only since the 1960s have artists really embraced archival principles to inform structure and shape their works This includes practices that consist of archive construction archaeological investigation record keeping and the use of archived materials but also interrogations of the principles claims and effects of the archive Staging the Archive shows how artists read the concept of the archive against the grain questioning not only what the archive is and can be but what materials images or ideas can be archived Ernst van Alphen examines these archival artists and artworks in detail setting them within their social political and aesthetic contexts Exploring the works of Marcel Duchamp Marcel Broodthaers Christian Boltanski Annette Messager Fiona Tan and Sophie Calle among others he reveals how modern and contemporary artists have used and contested the notion of the archive to establish new relationships to history information and data *Genre Analysis and Corpus Design* Ulrike Henny-Krahmer,2024-01-22 This work in the field of digital literary stylistics and computational literary studies is concerned with theoretical concerns of literary genre with the design of a corpus of nineteenth century Spanish American novels and with its empirical analysis in terms of subgenres of the novel The digital text corpus consists of 256 Argentine Cuban and Mexican novels from the period between 1830 and 1910 It has been created with the goal to analyze thematic subgenres and literary currents that were represented in numerous novels in the nineteenth century by means of computational text categorization methods To categorize the texts statistical classification and a family resemblance analysis relying on network analysis are used with the aim to examine how the subgenres which are understood as communicative conventional phenomena can be captured on the stylistic textual level of the novels that participate in them **Archives** Andrew Lison,Marcel Mars,Tomislav Medak,Rick Prelinger,2019-07-30 How digital networks and services bring the issues of archives out of the realm of institutions and into the lives of everyday users Archives have become a nexus in the wake of the digital turn Electronic files search engines video sites and media player libraries make the concepts of archival and retrieval practically synonymous with the experience of interconnected computing Archives today are the center of much attention but few agendas Can archives inform the redistribution of power and resources when the concept of the public library as an institution makes knowledge and culture accessible to all members of society regardless of social or economic status This book sets out to show that archives need our active support

and continuing engagement This volume offers three distinct perspectives on the present status of archives that are at once in disagreement and solidarity with each other from contributors whose backgrounds cut across the theory practice divide Is the increasing digital storage of knowledge pushing us toward a turning point in its democratization Can archives fulfill their paradoxical potential as utopian sites in which the analog and the digital the past and future and remembrance and forgetting commingle Is there a downside to the present day impulse toward total preservation **Paleolimnology: Insights from sedimentary archives** Adriana Aránguiz-Acuña,Kunshan Bao,Xiaofeng Cao,2024-01-16 **Issuance of Revised NPS Museum Handbook Part II, Appendix D: Museum Archives and Manuscript Collections, 2008** ,2009

working in the disciplines of archival science information studies and psychology It should also be essential reading for those with an interest in social justice issues transitional justice history philosophy memory studies and postcolonial studies
