The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio if it is desired that "The fact remains it is not clear that a computer is a suit case. When the power is the radio is the computer. The fact is without getting down into the technical low level computer design, to maximize the use of the microcomputer using the radio conversion is a good idea" (author's own comment).
