As you can see from the diagram above, the P Set consists of two pickups. Both pickups are identical in size and shape. Either can be used for the P-45 5-strings or the P-45 6-strings. The only difference between them is the connector on the bottom of the pickup.

All EMS-42 Pickups are compatible with each other. The connector system is an easy method of installation, avoiding the need to solder.

EMS Accessory Circuits like the WUPP, EMS, BTC or BDC Controls can be added to any EMS Pickup System, all have buffered inputs and can be used on either passive or active pickups. The \$150 Base included with the set will be used as instruments that use a selector switch.

It is common practice to ground boards (the alligator of an instrument that uses passive pickups) to reduce noise. This means there will be a wire coming from the bridge into the control cavity that will be hooked to one of the pots. Included with the EMG-A2 System is a single black wire with a connector on it and an IDC connector that will attach to the existing ground wire and will provide the ground (earth) connection.

[illegible]

All DHD Picturis and accessories are warranted for a period of two years. This warranty does not cover failure due to improper installation, abuse or damage. If upon examination the pickup is determined to be defective, a replacement will be made. Warranty replacement products are covered by this same warranty. This warranty covers only those pickups and accessories sold by authorized DHD Dealers. This warranty is not transferable.
