## **Engineering Science Nquestion Papers Memos:**

**In Search of Technological Excellence** John Heywood, 2025-09-04 The notion that Britain was losing its international industrial competitiveness has preoccupied governments since the Second World War. Policymakers have sought to address this over the years and yet Britain's relative industrial decline has appeared to continue, raising questions about its root causes. *In Search of Technological Excellence* analyses the policymaking and policy implementation in the education of engineers and technologists from the 1945 report of the Percy Committee on Higher Technological Education to the conclusion of the Thatcher government's Enterprise in Higher Education Initiative. Using a plethora of previously unpublished sources, this book focuses on the untold story of what the reports of the three key committees in this fifty-year period—Percy 1945, Fielden 1963, and Finniston 1980—actually achieved in secondary and higher technological education. The core themes of this volume include industrial training and its assessment, the controversy over the structure of industrial sandwich courses, the perceived requirements for qualified specialists, the manpower controversy, curriculum development, creativity and innovation in engineering, engineers as managers, and engineering in schools. Thought-provoking and comprehensive, *In Search of Technological Excellence* reflects on perennial problems to help clarify how this history can inform policymaking today and will be of interest to policymakers, practitioners, and students in engineering education and public administration.

**NASA Technical Memorandum ,1991      Recent Advances in Engineering Science** Severino L. Koh, Charles G. Speziale, 2012-12-06 The 25th Anniversary Meeting of the Society of Engineering Science was held as a joint conference with the Applied Mechanics Division of the American Society of Mechanical Engineers at the University of California Berkeley from June 20-22, 1988. With the encouragement and support of the SES, we decided to organize a symposium in honor of A. C. Eringen, the founding president of the Society of Engineering Science, who provided pioneering leadership during the critical first decade of the Society's existence. We felt that there was no better way to do this than with a Symposium on Engineering Science, the field that A. C. Eringen has devoted his life to. Professor Eringen had the foresight even in his own early work to see the need for an intimate amalgamation of engineering

and science transcending the bounds of the traditional engineering disciplines to address unsolved problems of technological importance Sustained by the belief that there was the need to provide a forum for researchers who had embraced this broader interdisciplinary approach Professor Eringen founded the Society of Engineering Science and the International Journal of Engineering Science in 1963 Since that time he has made countless contributions to the advancement of engineering science through his research educational and organizational activities The participants in the Symposium were former students and colleagues of Professor Eringen who have been strongly influenced by his professional activities and research in engineering science
