*50 Years of CFD in Engineering Sciences* Akshai Runchal, 2020-03-09

Prof D Brian Spalding working with a small group of students and colleagues at Imperial College London in the mid to late 1960s single handedly pioneered the use of Computational Fluid Dynamics (CFD) for engineering practice. This book brings together advances in computational fluid dynamics in a collection of chapters authored by leading researchers, many of them students or associates of Prof Spalding. The book intends to capture the key developments in specific fields of activity that have been transformed by application of CFD in the last 50 years. The focus is on review of the impact of CFD on these selected fields and of the novel applications that CFD has made possible. Some of the chapters trace the history of developments in a specific field and the role played by Spalding and his contributions. The volume also includes a biographical summary of Brian Spalding as a person and as a scientist as well as tributes to Brian Spalding by those whose life was impacted by his innovations. This volume would be of special interest to researchers, practicing engineers and graduate students in various fields including aerospace, energy, power and propulsion, transportation, combustion, management of the environment, health and pharmaceutical sciences.
