Hoods Carl Fellstrom,2010-08-26 In 2004 the murder of a middle aged couple in their village bungalow lifted the lid on the great untold story of British organised crime The slaughter of Joan and John Stirland revealed an evil empire of powerful ganglords contract killings and police corruption At its dark heart was the East Midlands city of Nottingham A prosperous centre of business education and leisure Nottingham had fallen under the shadow of vicious gangsters Eventually its police were investigating so many murders that their boss had to appeal to other forces for help and the influx of drugs and weapons saw the city labelled Gun Capital UK HOODS traces the roots of the gangs revealing how economic dislocation and the clash of cultures between working class white residents and black immigrants from the 1950s onwards created an alienated underclass In the 1990s a more malignant breed of organised criminal emerged Crime families who had been involved in armed robbery protection rackets and extortion now sought to control the recreational drugs trade and forged links across Europe to import wholesale quantities of cocaine ecstasy and amphetamines By 2002 shootings were running at one a week HOODS uncovers how outlaw Yardies pioneered the sale of crack cocaine and imported the ruthless violence of the Jamaican ghettos how young black gangs from the so called NG Triangle of the Meadows St Ann s and Radford areas clashed in a series of turf wars how the shadowy Dawes Cartel built a lucrative international drugs empire and how the Bestwood Cartel and its terrifying leader Colin Gunn corrupted police officers and left dead and maimed in its wake As local police struggled to cope with the mayhem MI5 and the National Crime Squad launched a massive undercover investigation into the Nottingham untouchables It led ultimately to the dismantling of some of the UK s most powerful crime networks HOODS is a stark account of what happens when the rule of the gun supplants the rule of law and fear stalks the streets

*Human Factors in Automotive Engineering and Technology* Dr Guy H Walker,Professor Neville A Stanton,Professor Paul M Salmon,2015-06-28 Offering a unique perspective on vehicle design and on new developments in vehicle technology this book seeks to bridge the gap between engineers who design and build cars and human factors as a body of knowledge with considerable value in this domain The work that forms the basis of the book represents more than 40 years of experience by the authors Human Factors in Automotive Engineering and Technology imparts the authors scientific

background in human factors by way of actionable design guidance combined with a set of case studies highly relevant to current technological challenges in vehicle design The book presents a novel and accessible insight into a body of knowledge that will enable students professionals and engineers to add significant value to their work *Ranger Margaret* , Road Congestion Pricing in Europe Harry Ward Richardson,Chang-Hee Christine Bae,2008-01-01 this book is an interesting collection of papers on the topic of road congestion pricing The reader should find this collection to be both interesting and informative but also quite thought provoking The papers also provide some very useful information about projects that have not worked or have not been implemented for various reasons and lessons that can be learnt from failures to implement and failures of pricing schemes Peter R Stopher International Planning Studies In February 2003 the London Congestion Charging Scheme was introduced and in 2006 a similar policy was introduced in Stockholm In both cases automobile traffic entering the cordon declined by about 20 percent This book evaluates these and other similar programs exploring their implications for the United States While there is increasing interest in road pricing in the US in many individual states the motivation is often highway financing rather than congestion relief The contributors argue that the prospects for extensive implementation in the US remain uncertain Nevertheless this book illustrates that the European experience suggests political feasibility is much less of a hurdle than was once considered and that congestion pricing would have a significant impact in reducing traffic as it did in Europe This study s value lies in the fact that it examines road pricing in the real world and not simply from a theoretical viewpoint As a comparative study it will appeal to both policymakers and academics in transportation economics and planning urban economics planning and economic geography *Popular Science* ,2000-10 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better Q and A: Law of Torts 2007-2008 David W. Oughton,John Marston,Barbara Harvey,2007 This text is intended to give students the chance to evaluate and assess their progress in the study of the law of torts It shows students how to successfully tackle the sort of problems found in examination papers Insider Guide to Easy Car Buying: Spend a Tenner Save a Grand Tony Willard, **The Automotive Industry and European Integration** A. J. Jacobs,2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain It delves into how European integration high wages and the demise of GM and Ford led to plant closings in Belgium Next it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry Finally it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years In sum this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations
