## **Foundations For Efficient Web Service Selection Advances In Database Systems:**

Foundations for Efficient Web Service Selection Qi Yu, Athman Bouguettaya, 2009-10-02 Foundations for Efficient Web Service Selection describes the foundational framework for efficient Web service selection. It lays out a theoretical underpinning for the design of models and algorithms for searching and optimizing access to Web services. Excerpts from Prof. Fabio Casati's foreword: "This excellent book looks at the search problem from a broader perspective. Instead of narrowing down on a specific aspect or subproblem of service search, it dissects and analyzes the fundamental problems in search and presents concrete applicable solutions as well as the theoretical foundations behind them. One aspect I found particularly significant in the book is the mind shift it generates from thinking about service modeling for the sake of supporting deployment or invocation to modeling for supporting search. This design for search approach is exactly what we do when we design databases because search is what we worry about in that case and there is no reason why this shouldn't be the case for services if we want services to be searchable with a similar effectiveness." *Database Systems for Advanced Applications* Lizhu Zhou, Beng Chin Ooi, Xiaofeng Meng, 2005-04-04 This book constitutes the refereed proceedings of the 10th International Conference on Database Systems for Advanced Applications DASFAA 2005 held in Beijing, China, in April 2005.
