Fragment D'histoire Future:

Between Literature and Science Wolf Lepenies, 1988 The theme of this book is the conflict which arose in the early nineteenth century between on the one hand the literary and on the other hand the scientific intellectuals of Europe as they competed for recognition as the chief analysts of the new industrial society in which they lived This conflicts was epitomised by the confrontation between Matthew Arnold and T H Huxley and later in that between F R Leavis and C P Snow Sociology was born as the third major discipline though in many ways it was a hybrid of the literary and the scientific traditions The social sciences continue even today to oscillate between these two traditions The author chronicles the rise of the new discipline by discussing the lives and work of the most prominent thinkers of the time in England France and Germany These include John Stuart Mill H G Wells Beatrice and Sidney Webb and T S Eliot Auguste Comte Charles Peguy Emile Durkheim Stefan George Thomas Mann Max Weber and Karl Mannheim At stake was the right to formulate a philosophy of life for contemporary society and to predict and pre empt the worst consequences of industrialization The book presents a penetrating study of idealists grappling with reality when industrial society was still in its infancy It will be of interest to those studying sociology and its history as a discipline but it is equally relevant to other social science subjects which may be said to have arisen at about the same time Back cover

Fragment D'histoire Future Jean Gabriel TARDE, 1904 The Ends of the World Déborah Danowski, Eduardo Viveiros de Castro, 2017-05-23 The end of the world is a seemingly interminable topic at least of course until it happens Environmental catastrophe and planetary apocalypse are subjects of enduring fascination and as ethnographic studies show human cultures have approached them in very different ways Indeed in the face of the growing perception of the dire effects of global warming some of these visions have been given a new lease on life Information and analyses concerning the human causes and the catastrophic consequences of the planetary crisis have been accumulating at an ever increasing rate mobilising popular opinion as well as academic reflection In this book philosopher D borah Danowski and anthropologist Eduardo Viveiros de Castro offer a bold overview and interpretation of these current discourses on the end of the world reading them as thought experiments on the decline of the West s anthropological adventure that is as attempts though not necessarily intentional ones at inventing a mythology that is adequate to the present This work has important implications for the future development of ecological practices and it will appeal to a broad audience interested in contemporary anthropology philosophy and environmentalism

The Oxford Handbook of Sociology and Organization Studies Paul S. Adler, 2009-03-27 Organizations are a defining feature of the modern world and the study of organizations organization studies has become

well established in both sociology departments and professional schools most notably business and management schools Organization studies has long drawn inspiration from foundational work in sociology The sociological lens affords depth of insight into the technological economic cultural and political forces that shape organizations from both within and without In particular classical works in sociology have long energized organizational research primarily by suggesting ways of making sense of the ever accelerating pace of social change In recent decades however the field has lost interest in these sociology classics This trend reflects and reinforces an increasingly inward looking and academic focus of contemporary organization studies Not only does this trend weaken organization studies engagement with the big social issues of our time but it isolates the field from the broader field of the social sciences The aim of this Handbook is to re assert the importance of classical sociology to the future of organization studies Alongside several thematic chapters the volume includes chapters on each of nearly two dozen major European and American theorists Each of these chapter addressing a the ideas and their context b the impact of these ideas on the field of organization studies and c the potential future research these ideas might inspire The goal is not reverential exegesis but rather to examine how the classics can energize organizational research This wide ranging Handbook with contributions from leading American and European scholars will be a vital informative and stimulating resource for anybody undertaking research in teaching or interested in learning more about organization studies today

Underground Man Gabriel de Tarde,2019-11-27 In *Underground Man* Gabriel de Tarde crafts a thought provoking exploration of individuality and social interaction through the lens of his unique philosophical ideals Written in the context of late 19th century France Tarde s narrative oscillates between fiction and philosophical discourse employing a modernist style that subverts traditional storytelling As he delves into the psyche of his protagonist Tarde weaves a complex tapestry of psychological and social commentary challenging prevailing notions of morality human behavior and the interplay of influence among individuals in an increasingly mechanized society Gabriel de Tarde was a pioneering sociologist and philosopher whose ideas often clashed with positivism and traditional scientific thought His background in law and experience in the judicial system informed his perspectives on social dynamics and the nature of influence Tarde s emphasis on the role of imitation and the interconnectedness of social actions reflects his attempt to bridge the gap between individual agency and collective behavior culminating in the creation of *Underground Man* as a medium to articulate these convictions This book is a must read for those interested in the foundations of social theory and the psychological underpinnings of modernity Tarde s incisive prose and innovative thought not only offer a captivating narrative but also invite readers to reflect deeply on their own existence within the social fabric

media concepts and practices often thought to emerge with the digital In showing the cinematic consciousness of Mallarmé and Breton and calling for a reappraisal of the influential poetry theory of the early filmmaker Jean Epstein *Cinepoetry* reevaluates the bases of literary modernism The book also explores the crucial link between trauma and trans medium experiments in the wake of two world wars and highlights the marginal identity of cinepoets who were often Jewish gay foreign born or on the margins What results is a broad rethinking of the relationship between film and literature The episteme of cinema the book demonstrates reached the very core of its supposedly highbrow rival while at the same time modern poetry cultivated the technocultural savvy that is found today in slams e poetry and poetic digital hybrids
