Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Developing Core Literacy Proficiencies, Grade 6 Odell Education, 2016-07-21 The Developing Core Literacy Proficiencies program is an

integrated set of English Language Arts Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards: CCSS Reading Closely for Textual Details, Making Evidence-Based Claims, Making Evidence-Based Claims about Literary Technique, Grades 9-12 Researching to Deepen Understanding, Building Evidence-Based Arguments. The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills: The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from making inferences to reflecting critically. Students focus on this set of twenty skills throughout the year and continually apply them in new and more sophisticated ways. Academic Habits: The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as preparing and completing tasks that are essential to students' success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system centered around the literacy skills and academic habits allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.

Brazilian Geography
 Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28. This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the geography of the country has developed by integrating, relating to and forming part of those realities as it headed out into the streets. Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory. This book thus covers the theoretical approaches in Brazilian geography, its different lines of research and above all its character as manifested in culture and society.
