Machine Learning and Immersive Technologies for User-centered Digital Healthcare Innovation Federico Colecchia, Eleonora

Ceccaldi,Daniele Giunchi, Fang Wang,Rui Qin,2025-06-09 Emerging technologies such as machine learning and immersive technologies including virtual reality and augmented reality hold great potential for driving disruptive healthcare innovation However the adoption of digital technology in healthcare including use of data driven tools in support of clinical decision making and patient facing applications relying on consumer electronic devices is often hindered by issues of user experience trust equitability and fairness There is increasing recognition of a need to facilitate further convergence between the development of emerging technologies and user centered design research for healthcare with a view to achieving a positive impact on patients care professionals and the healthcare system This article collection addresses current development trends relating to user centered digital healthcare innovation based on machine learning and immersive technologies in order to identify opportunities associated with the deployment of new solutions in a range of environments including clinical domestic and educational settings and barriers to the adoption of technology by end users A key aim is to identify opportunities for strengthening interdisciplinary collaboration as well as methods of lowering barriers and overcoming obstacles for the benefit of patients care professionals and the healthcare system Examples of potential outcomes are effective design and use of solutions based on machine learning and immersive technologies to improve user experience strategies to facilitate ethical development of digital technology for healthcare and methods of encouraging adoption of advanced tools developed in line with principles of equitability and fairness Articles should address issues of user centered digital healthcare innovation driven by machine learning and immersive technologies Submissions should ideally be positioned at the intersection of digital technology development with user centered design although contributions more technical in nature as well as user experience studies are also welcome A non exhaustive list of suitable topics and manuscript types is given below Machine learning and or immersive technologies including augmented reality and virtual reality for user centered digital healthcare Clinical decision support systems Patient facing applications Tools for education and training of future medical professionals Potential barriers to adoption of technology issues of user experience trust equitability and fairness in digital healthcare Reviews and contributions discussing the development of intuitive accessible and inclusive digital interfaces All aspects of healthcare that are being or have the potential to be impacted by machine learning and immersive technologies Urban Innovation Systems Willem van Winden,Erik Braun,Alexander Otgaar,Jan-Jelle Witte,2014-04-11 Why are some regions and cities so good at attracting talented people creating high level knowledge and producing exciting new ideas and innovations What are the ingredients of success Can innovative cities be created and stimulated or do they just flourish by mere chance This book analyses the development and management of innovation systems in cities in order to provide a better understanding of what makes such systems perform The book opens by developing a conceptual model that combines insights from urban economics with economic geography urban governance and place marketing This highlights the relevance of path dependence different types of proximity and the role of clusters networks and platforms institutional

conditions place attractiveness and place identity in the evolution of local innovation systems The authors then draw on this conceptual framework to structure empirical case studies in three cities with a relatively high innovation performance Eindhoven the Netherlands Stockholm Sweden and Suzhou China Through these case studies they provide a detailed analysis of how successful innovation systems evolve and what makes them tick Unique to this book is the linking of analysis to concrete policy and management responses The book ends with a discussion on six themes in the development of successful urban innovation systems firm capabilities and leader firms higher education and research attractive environment place branding institutional environment and entrepreneurship Each theme is examined fully drawing lessons from the case studies and from recent insights and other cases discussed in the literature This title will be of interest to students researchers and policymakers involved in regional innovation systems knowledge locations and cluster development

Knowledge and Innovation Helen Brown, 2007-10-17 This new book presents case studies from the US the UK and Japan Packed full of vignettes from cases studies and subscribing to a socio cultural approach rather than the often tacit assumption that knowledge and technology transfer is a logistical problem this excellent volume illuminates the often misunderstood process of knowledge transfer Arguing that partnership between public and private sector organizations can take many forms some of which are very complicated Brown shows that partnership should not be prescribed as a panacea for the delivery of complex policy in education health and economic regeneration Instead policy makers need to adopt a much more subtle and sophisticated concept of multi agency partnership that acknowledges the time and effort needed to build trust and new shared practices Taking issue with weak theories of change endemic in some policies and emphasizing the process of knowledge creation and the significance of consequent changes in the dynamics of human relations Brown conceptualizes innovation as collaboration between diverse organizations and individuals the result of which is organizational learning This book will be of great interest to students and researchers interested in policy studies business and management and education as well as policy makers engaged with communities of practice theory
