A Practitioner's Guide to the Unified Patent Court and Unitary Patent Paul England, 2022-12-01 A Practitioner's Guide to the Unified Patent Court and Unitary Patent provides practical and detailed advice on all aspects of the system for those using it The book explains how the UPC system works in the context of the wider European patent system including the UK and how parties can use it to enforce or revoke European patents and the Unitary Patent in particular The procedures of the UPC from initiating proceedings to appeal damages and costs hearings Rules on competence substantive law jurisdiction language and judges The operation of the system alongside the national courts of the contracting countries the European Patent Office opposition and appeal procedure and parallel English Patents Court proceedings The book is written for private practitioners and in house counsel by a team of patent experts with many years of experience in patent litigation in France Germany the Netherlands and the UK It provides insights from national approaches to the features above and gives answers to common problems

Vray 5.0 (NEXT) User Guide Serdar Hakan DÜZGÖREN, Universal V Ray Settings This page provides a tutorial on universal settings for V Ray that work for most still images Overview The universal settings comprise a set of settings that work very well for still images in many situations and are the default for V Ray Next Please note that these settings are not optimal in the sense that with enough tweaking you can probably get similar quality with faster render times The beauty of these settings though is that they require almost no tweaking and you are guaranteed to get a good result in the end The advantages of these settings are o very little parameters for controlling render quality vs speed o works for a very large number of scenes o produces high quality results With the Progressive Image Sampler the default Render time min is set to 1 0 which might be insufficient for

some scenes You can reset this to 0 0 min and rendering will continue until the Noise threshold is reached Setting the V Ray Renderer 1 Set V Ray as the current rendering engine with the default V Ray settings 2 The default settings are optimized to work universally so it is recommended to keep them Progressive image sampler with 100 Max subdivs and 1 Min subdivs GI enabled using Brute Force as Primary GI engine and Light Cache as Secondary GI engine 3 You can further refine the noise levels from the Progressive Image sampler rollout by adjusting the Noise Threshold and placing a 0 value for the Render time min 4 You can control the amount of AA vs shading samples for materials lights GI using the Min shading rate parameter in the Image Sampler rollout but the default value is optimised to work well for the majority of scenes Good Clinical
