Framing Global Health Governance Colin McInnes, Kelley Lee, 2016-01-08 Globalisation is influencing not only patterns of health and disease worldwide but how decisions on health are made and organised This is the arena of Global Health Governance Despite some successes in developing better global governance for health progress overall has been disappointingly slow This is especially so given the number of health crises today some of which are long standing but others relatively new This book explores how progress has often been limited but also on occasion assisted by the role of ideas It identifies how health issues such as HIV AIDS pandemic influenza and tobacco control are framed in such a way as to resonate with a set of ideas or worldviews associated with particular policy communities A successful framing can generate possibilities for action but can also lead to competition when ideas conflict or suggest different pathways of response Global Health Governance therefore is an arena of competition as well as cooperation where ideas matter as well as resources and political will This book was originally published as a special issue of Global Public Health
