

Operation of the Pressure Dial

The pressure dial should normally be set at 3, except for the following:

- Set the dial at 2 for applique.
- Set the dial at 1 for sewing delicate synthetic fabrics, and furled fabrics which tend to stretch out of shape.

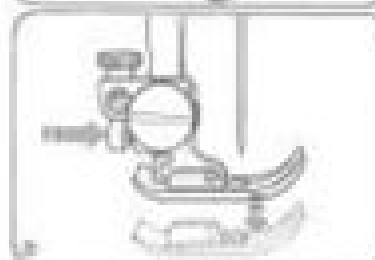

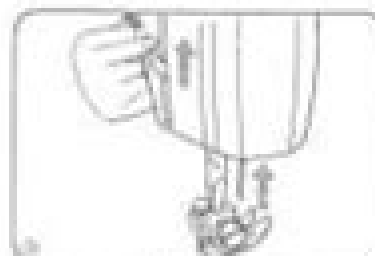

* When the dial has been turned to a position other than 3, it must always be reset to 3 for normal sewing.

Raising or Lowering the Presser Foot

By raising or lowering the presser foot lifter, the presser foot goes up and down respectively. For additional clearance, the presser foot lifter can be raised higher to sew on heavy fabrics.

Removing the Presser Foot

To Remove:

- 1 To remove the presser foot, turn the balance wheel towards you and raise the needle to its highest position. Lift the presser foot.

- 2 By pressing the red button on the back of the foot holder, the presser foot will drop off.

* Do not force the presser foot to release it.

To Attach:

- 1 To attach the presser foot, place the presser foot so that the pin on the foot lies just under the groove of the foot holder. Lower the presser foot lifter. When attaching the presser foot, the pressure dial should always be at position "3".

- 2 When the presser foot lifter is raised you'll find that the presser foot is locked in place.
