Maths Pmemo June 2015:

Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step **Irreducible**

Geometric Subgroups of Classical Algebraic Groups Timothy C. Burness,, Soumaïa Ghandour, Donna M.

Testerman, 2016-01-25 Let G be a simple classical algebraic group over an algebraically closed field of characteristic p with a natural module V Let H be a closed subgroup of G and let W be a non trivial irreducible tensor indecomposable restricted rational module such that the restriction of W to H is irreducible In this paper the authors classify the triples of this form where H is a disconnected maximal positive dimensional closed subgroup of G preserving a natural geometric structure on V On

Cannarsa, P. Martinez, J. Vancostenoble, 2016-01-25 Degenerate parabolic operators have received increasing attention in recent years because they are associated with both important theoretical analysis such as stochastic diffusion processes and interesting applications to engineering physics biology and economics This manuscript has been conceived to introduce the reader to global Carleman estimates for a class of parabolic operators which may degenerate at the boundary of the space domain in the normal direction to the boundary Such a kind of degeneracy is relevant to study the invariance of a domain with respect to a given stochastic diffusion flow and appears naturally in climatology models **Pathways to Reform**

Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the

attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid

Reduced Fusion Systems over 2-Groups of Sectional Rank at Most 4 Bob Oliver, 2016-01-25 The author classifies all reduced indecomposable fusion systems over finite groups of sectional rank at most 4 The resulting list is very similar to that by Gorenstein and Harada of all simple groups of sectional rank at most 4 But this method of proof is very different from theirs and is based on an analysis of the essential subgroups which can occur in the fusion systems

How the Brain Learns David A. Sousa, 2022-01-14 This book shows educators how to deliver game changing and brain changing results for students In this edition the author translates new insights and evolving research into concrete actions and strategies for the classroom

On the Singular Set of Harmonic Maps into DM-Complexes Georgios Daskalopoulos, Chikako Mese, 2016-01-25 The authors prove that the singular set of a harmonic map from a smooth Riemannian domain to a Riemannian DM complex is of Hausdorff codimension at least two They also explore monotonicity formulas and an order gap theorem for approximately harmonic maps These regularity results have applications to rigidity problems examined in subsequent articles

Lie Theory and Its Applications in Physics Vladimir Dobrev, 2023-01-29 This volume presents modern trends in the area of symmetries and their applications based on contributions to the Workshop Lie Theory and Its Applications in Physics held in Sofia Bulgaria on line in June 2021 Traditionally Lie theory is a tool to build mathematical models for physical systems Recently the trend is towards geometrization of the mathematical description of physical systems and objects A geometric approach to a system yields in general some notion of symmetry which is very helpful in understanding its structure Geometrization and symmetries are meant in their widest sense i e representation theory algebraic geometry number theory infinite dimensional Lie algebras and groups superalgebras and supergroups groups and quantum groups noncommutative geometry symmetries of linear and nonlinear partial differential operators special functions and others Furthermore the necessary tools from functional analysis are included This is a big interdisciplinary and

interrelated field The topics covered in this Volume are the most modern trends in the field of the Workshop Representation Theory Symmetries in String Theories Symmetries in Gravity Theories Supergravity Conformal Field Theory Integrable Systems Quantum Computing and Deep Learning Entanglement Applications to Quantum Theory Exceptional quantum algebra for the standard model of particle physics Gauge Theories and Applications Structures on Lie Groups and Lie Algebras This book is suitable for a broad audience of mathematicians mathematical physicists and theoretical physicists including researchers and graduate students interested in Lie Theory

Mindsets for Parents Mary Cay Ricci, Margaret Lee, 2023-12-19 All parents want their children to be successful but success is not just about giving your kids praise or setting them on the right direction Research shows that success is often dependent on mindset That's where the updated edition of Mindsets for Parents comes in Designed to provide a roadmap for developing a growth mindset home environment this book's conversational style and real world examples make the popular mindsets topic approachable and engaging It includes tools for informally assessing the mindsets of both parent and child easy to understand updated brain research brand new examples and prompts for self reflection as well as suggested strategies and resources for use with children of any age Also included in this updated edition are book club questions designed to get parent groups thinking and collaborating in order to make the most of these strategies This book gives parents guardians coaches caregivers and anyone who works with children powerful knowledge and methods to help themselves and their children learn to embrace life's challenges with a growth mindset and an eye toward increasing their effort and success
