Students' Accuracy in Written English Under the Impression of the new "G8" System - a Case Study Johanna Schroeder,2014-04-11 Inhaltsangabe

Introduction In Germany education matters lie within the scope of each of the 16 German federal states. Consequently there is no unique educational system which is valid for the entire Federal Republic of Germany but 16 individual ones. However a German wide basic framework including regulations about the compulsory school attendance for instance does exist. The duration of compulsory schooling until passing the Abitur at the Gymnasium however is not regulated by this framework but belongs to the power of decision of each federal state. For instance in Thuringia and Saxony the duration of compulsory schooling at the Gymnasium has been limited to eight years as it was already the case before the reunification of Germany in 1990. In the other federal states like North Rhine Westphalia for example the duration of compulsory schooling at the Gymnasium included an additional ninth year resulting in the fact that the students attended the Gymnasium from grade 5 until grade 13. Nevertheless in 2001 the ministry of education of the federal state Saarland decided for a reduction of the duration of compulsory schooling at the Gymnasium by one year. By now all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium. After many heated discussions also the North Rhine Westphalian ministry of education decided for a reduction of the duration of compulsory schooling at the Gymnasium. As a consequence of this decision students of two grades G8 and G9 students entered the upper secondary level at all North Rhine Westphalian Gymnasien on August 31st 2010. Ministerium für Schule und Weiterbildung des Landes Nordrhein Westfalen n d a. The students of this so called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams. Hence it must be guaranteed that G8 students have the same preconditions as G9 students despite having one year less of general schooling before graduating. Since no students have entered the upper secondary level after only five years at the Gymnasium in North Rhine Westphalia before 2010 empirical research in this area is hardly available by now. Nevertheless this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not. Especially in the context of learning

Interest in Mathematics and Science Learning Ann Renninger, Martina Nieswandt, Suzanne Hidi, 2015-04-19
Interest in Mathematics and Science Learning edited by K Ann Renninger, Martin Nieswandt and Suzanne Hidi is the first volume to assemble findings on the role of interest in mathematics and science learning. As the contributors illuminate across the volume's 22 chapters interest provides a critical bridge between cognition and affect in learning and development. This volume will be useful to educators, researchers and policy makers especially those whose focus is mathematics, science and technology education.

Visualisation and Epistemological Access to Mathematics Education in Southern Africa Marc Schäfer, 2023-04-27. This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa. Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross

inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education
