From the get go, my fingers knew how to type..."** *DR. GABRIEL MARQUEZ*

Comparable speed.

One-handed typing speeds of the 50 & 50 keyboard are double those of most one-handed keyboards. This page is comparable to the performance of most two-handed keyboards, and more than sufficient to operate most PCs.

Comparable skills.

One-handed typing is fast and easy on the 50 keyboard. Once it's your existing skills, the learning curve is very short.

An average touch typist can start one-handed typing immediately, and will reach 20 words per minute (wpm) after less than 10 hours of use.

For a one-handed typist, learning time is the same as learning two-handed typing.

Use either hand - or both.

The 50 keyboard allows one-handed typing using either hand, left or right, or both hands, just like a standard keyboard.

One-handed typing can be switched on or off using the "toggle" key. Press once for one-handed typing, press twice for two-handed typing.

How do I type with one-hand?

One-handed typing on the 50 keyboard is a lot like two-handed touch typing.

1. Press the "toggle" key once to turn on one-handed typing (pressing twice turns it off).
2. Place your hand in the standard home row position, and touch-type in the standard way.
3. For letters of the other (non-used) hand, reach down the space bar with your thumb, and use the fingers of your typing hand to do the same movements that the other hand normally does.

4. Tap the space bar to type spaces.
5. Tap the Shift key once to capitalize the next letter you type.

The industry standard.

Matias has proudly served the needs of the disability community for over 15 years. Its technology is the de facto standard for one-handed typing in the industry.
