Machine Tool Structures F. Koenigsberger, J. Tlustý, 2016-01-21 Machine Tool Structures Volume 1 deals with fundamental theories and calculation methods for machine tool structures Experimental investigations into stiffness are discussed along with the application of the results to the design of machine tool structures Topics covered range from static and dynamic stiffness to chatter in metal cutting stability in machine tools and deformations of machine tool structures This volume is divided into three sections and opens with a discussion on stiffness specifications and the effect of stiffness on the behavior of the machine under forced vibration conditions The following chapters explore the stability of the machine structure against chatter methods of stability analysis tests and principles of dampers chatter during grinding operations and stresses and deformations of closed box structures subjected to bending and shear Calculation methods for determining stiffness constants of a structure s individual parts as well as methods for determining the resulting stiffnesses modal shapes and their parameters are also described The final chapter presents systematic procedures for the analysis of machine tool structures This book is intended for university students research workers and designers Time-Domain Signature

Barcodes for Chipless-RFID and Sensing Applications Ferran Martín, Cristian Herrojo, Javier Mata-Contreras, Ferran Paredes, 2020-02-01 This book presents an unconventional approach for implementing chipless radiofrequency identification RFID systems and related sensors Contrary to most state of the art chipless RFID systems the proposed approach is based on time domain and the tags are read through near field The book discusses different aspects of these chipless RFID systems including tag and reader design strategies to enhance the data density and capacity tag programming and erasing tag implementation in plastic and paper substrates and synchronous tag reading among others A tolerance analysis and validation of the different systems as well as prospective applications are also included The book also offers a comprehensive overview of the state of the art in chipless RFID technology including a comparative analysis which is extended also to chip based RFID systems Readers are expected to be familiar with RF microwave engineering technology Besides master s and postgraduate students the book is intended for researchers in the field of radiofrequency identification RFID technology and may be of interest for engineers working in the areas of wireless communications automatic identification security authentication microwave and wireless sensors as well as those dealing with internet of things IoT and smart systems
