Design with nature. [By] Ian L. McHarg. (Second printing.). American Museum of Natural History (NEW YORK), Ian Lennox MACHARG, 1969

A Quest for Life Ian L. McHarg, 1996-04-27 Show me any civilization that believes that reality exists only because man can perceive it that the cosmos was erected to support man on its pinnacle that man is exclusively divine and then I will predict the nature of his cities and its landscapes the hot dog stands the neon shill the tacky tacky houses the sterile core the mined and ravaged countryside This is the image of anthropocentric man He seeks not unity with nature but conquest yet unity he finds when his arrogance and ignorance are stilled and he lies dead under the greensward Ian L McHarg *Multiply and Subdue the Earth* 1969 No living American has done more to usher the gentle science of ecology out of oblivion and into mainstream thought than Ian McHarg a teacher philosopher designer and activist who changed the way we view and shape our environment From the foreword by Stewart L Udall Published in cooperation with the Center for American Places Harrisonburg Virginia *A Quest for Life* is the autobiography of a man who stands alongside Rachel Carson Lewis Mumford and Aldo Leopold as one of the giants of the environmental movement In a robust and singular voice Ian McHarg recounts the story of a life that has foreshadowed and eventually shaped

environmental consciousness in the twentieth century Along the way we meet prominent figures in the environmental movement the design fields and the government from Walter Gropius to Lady Bird Johnson all presented in rich and telling anecdotes Early in *A Quest for Life* McHarg presents us with an arresting image Describing the view from his boyhood home on the outskirts of Glasgow he tells us that in one direction he could see the industrial miasma of smokestacks tenements and treeless streets and in another the glories of the Scottish countryside I was born and bred he writes on a fulcrum with two poles city and countryside Confronted with such a stark contrast the man who was to become the founder of ecological planning began at an early age to turn literally from inhumane urban development and toward the beauty and power of Nature Each chapter of this book illuminates key stages in McHarg's life and in the evolution of his environmental awareness We see him as a youth standing on a hillside beside the impressive Donald Wintersgill who with the wave of his cane lays out an entire village complete with lakes and forests and thus introduces the astonished McHarg to the profession of landscape architecture In some of the bloodiest battles of the Second World War he witnesses the magnitude of human destructive capability Later when he faces a crisis of conscience over his religious training and its exhortation to gain dominion over life and subdue the earth he begins to develop a deep spiritual appreciation for the sanctity of Nature itself His training as a designer and planner in the Modernist Bauhaus tradition with its neglect of the environment his bouts with tuberculosis that showed him the link between public health and city planning his famous *Man The Planetary Disease* speech before powerful industrialists all stand as emblematic of battles that are still being fought today *A Quest for Life* also chronicles the many triumphs in McHarg's career It offers fresh insight into the revolutionary design method behind his groundbreaking book *Design with Nature* and explores the development of geographical information systems We learn firsthand about his work on the celebrated regional plans for Denver and the Twin Cities as well as the Woodlands new town project His most enduring contribution however may prove to be his four decades of teaching at the University of Pennsylvania Through the generations of landscape architects designers and planners he taught there his influence has spread around the world and into the future As the compelling first person story of a remarkable individual who not only manned the barricades against environmental destruction but helped lay the foundation for the barricades themselves *A Quest for Life* is must reading for landscape architects designers conservationists planners and others concerned with the preservation of our communities and the natural environment

Ian McHarg and the Search for Ideal Order Kathleen John-Alder, 2019-09-17 Ian McHarg and the *Search for Ideal Order* looks at the well known and studied landscape architect Ian McHarg in a new light The author explores McHarg's formative years and investigates how his ideas developed in both their complexity and scale As a precursor to McHarg's approach in his influential book *Design with Nature* this book offers new interpretations into his search for environmental order and outlines how his struggle to understand humanity's relationship to the environment in an era of rapid social and technological change reflects an ongoing challenge that landscape design has yet to fully resolve This

book will be of great interest to academics and researchers in landscape architectural history *To Heal the Earth* Ian L. McHarg, 2007-04 Ian L. McHarg's landmark book *Design with Nature* changed the face of landscape architecture and planning by promoting the idea that the design of human settlements should be based on ecological principles. McHarg was one of the earliest and most influential proponents of the notion that an understanding of the processes that form landscapes should underlie design decisions. In *To Heal the Earth*, McHarg has joined with Frederick Steiner, a noted scholar of landscape architecture and planning, to bring forth a valuable cache of his writings produced between the 1950s and the 1990s. McHarg and Steiner have each provided original material that links the writings together and places them within the historical context of planning design work and within the larger field of ecological planning as practiced today. The book moves from the theoretical beginning with the 1962 essay *Man and Environment*, which sets forth the themes of religion, science, and creativity that emerge and reappear throughout McHarg's work, to the practical, including discussions of methods and techniques for ecological planning as well as case studies. Other sections address the link between ecology and design and the issue of ecological planning at a regional scale, covering topics such as education and training necessary to develop the field of ecological planning, how to organize and arrange biophysical information to reveal landscape patterns, the importance of incorporating social factors into ecological planning, and more. *To Heal the Earth* provides a larger framework and a new perspective on McHarg's work that brings to light the growth and development of his key ideas over a forty-year period. It is an important contribution to the literature and will be essential reading for students and scholars of ecological planning as well as for professional planners and landscape architects.

The Sustainable Urban Development Reader Stephen M. Wheeler, Timothy Beatley, 2004 Bringing together classic readings from a wide variety of sources, this key book investigates how our cities and towns can become more sustainable. Thirty-eight selections span issues such as land use planning, urban design, transportation, ecological restoration, economic development, resource use, and equity planning. Section introductions outline the major themes, whilst the editors' introductions to the individual writings explain their interest and significance to wider debates. Additional sections present twenty-four case studies of real-world sustainable urban planning examples, sustainability planning exercises, and further reading. Providing background in theory, practical application, and vision in a clear, accessible format, *The Sustainable Urban Development Reader* is an essential resource for students, professionals, and indeed anyone interested in the future of urban environments.
