Meade Telescope Buying Guide:

A User's Guide to the Meade LX55 and LX75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LX55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LX75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LX Goto telescope series first came from comments about an LX55 AR 6 Refractor review that was published on the LX55.com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LX owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LX55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LX telescope

So You Want a Meade LX Telescope! Lawrence Harris, 2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been They are surely all correct The great leap of our time is that computer designed and machined parts have led to more accurately made components that give the astronomer ever better views The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker The new products did not end the work of craftsman telescope makers though Many highly skilled amateur professional opticians continued to produce good quality mirrors that are still seen today Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals This has greatly increased the possibilities of serious astronomy projects for which tailor made software has been developed Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1.1 Look Before You Leap But first a word of caution Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a we featured telescope Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest

A Buyer's and User's Guide to Astronomical Telescopes & Binoculars James Mullaney, 2007-05-26 Both beginning novice amateur astronomers at the level of *Astronomy* and *Night Sky* magazine readers as well as more advanced amateur astronomers level of *Sky and Telescope* will find this book invaluable and fascinating It includes detailed up to date information on sources selection and use of virtually every major type brand and model of such instruments on today's market The book also includes details on the latest released telescope lines e.g. the 10 12 14 and 16 inch aperture models of the Meade LX R series As a former editor for *Sky Telescope Astronomy* and *Star Sky* magazines the author is the ideal person to write this book
