Measuring Up Answer Keys Ela:

Measuring Up Arie L. Nettles, Michael T. Nettles, 2012-12-06 *Measuring Up* revisits vital issues of equity and assessment through the research efforts and insights of many of the nation's most prominent educators and assessment experts. As its most urgent purpose, the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which under optimal circumstances have the potential to benefit all students. With America fervently espousing both national and state testing, the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion, graduation, and college admissions. In response to such punitive testing, the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems. In the process, outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences. As the various authors probe the gap between African American and White test scores, they raise important questions of resources, family background, and educational opportunity. Beyond their value of their recommendations to educators, their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers. To reinforce the emphasis on equity, several authors present a definitive defense of affirmative action as a critical countermeasure to the lack of fairness in school quality, family and social supports, and educational resources. *Measuring Up* Janet E. Wall, Garry Richard Walz, 2004 This intense handbook covers a variety of issues from best standardized testing procedures to evaluating student achievement through performance standards. Included are special topics like the assessment of students with mental or behavioral problems, helping students with limited English proficiency, and ethnic differences incorporated into testing. The role of the educator or counselor is studied while reporting test results to parents or social service agencies, facilitating career development, and designing needs assessment for individuals or programs.
